Cultivating the Future
Based on Science

Volume 2
Livestock, Socio-economy and Cross disciplinary Research in Organic Agriculture

Proceedings of the Second Scientific Conference of the International Society of Organic Agriculture Research (ISOFAR), held at the 16th IFOAM Organic World Congress in Cooperation with the International Federation of Organic Agriculture Movements (IFOAM) and the Consorzio ModenaBio, 18 - 20 June 2008 in Modena, Italy
The contents of the articles in this volume are the responsibility of the authors. The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from sources believed by the authors to be reliable but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk.

Should the publication of corrigenda become necessary, these will be posted at the conference homepage http://www.isofar.org/Modena2008/

The 2nd Scientific Conference of the International Society of Organic Agriculture Research (ISOFAR) was held June 18-20, 2008 in Modena Italy, in the frame of the 16th Organic World Congress of the International Federation of Organic Agriculture Movements (IFOAM), organised by Consorzio ModenaBio. The 4th Congress of the European Integrated Project “Quality Low Input Food” (QLIF) was convened as part of the 2nd ISOFAR Conference (see papers in volume 2 of these proceedings).

# Table of contents

**Preface**  
17

**Dear Reader**  
19

**Acknowledgements**  
21

**Welfare indicators and welfare promotion of organic animals**  
23

- Assessment of skin damages in dairy cows  
  Smolders, G.  
  24

- Evaluation of Laying Hen Strains for biodynamic Farms  
  Zeltner, E.  
  28

- Risk factors for feather pecking in organic laying hens –starting points for prevention in the housing environment  
  32

- Monitoring the welfare of sheep in conventional and organic farms using an ANI 35 L derived method  
  Napolitano, F., De Rosa, G., Ferrante, V., Barbieri, S. & Braghieri, A.  
  36

- Development of animal health and welfare planning in organic dairy farming in Europe  
  40

- Knowledge Transfer in the Animal Health Planning Process: Putting Research into Practice  
  Roderick, S., Ellis, K. & Bassett, A.  
  44

- Effects of different stocking rates with dairy cows on herbage quality and milk production in organic farming  
  Schori, F.  
  48

- Broilers welfare, health and production in organic and conventional systems  
  Ferrante, V., Baroli, D., Lolli, S. & Di Mauro, F.  
  52

- Veterinary treatment in organic husbandry  
  Koopmann, R., Ganter, M. & Link, M.  
  56

- Principles and practicality of organic dairy cattle breeding: different options and implications  
  Nauta, W.J. & Roep, D.  
  60

- Livestock Production Practices of Registered Organic Farmers in Uttarakhand State of India  
  Subrahmanyeswari, B. & Chander, M.  
  64

**Handling of animal welfare and disease challenges**  
69

- A Longitudinal Study of Mastitis on an Experimental Farm with Two Herds, One Managed Organically, the other Conventionally  
  Thatcher, A., Petrovski, K., Holmes, C., Dowson, K., Kelly, T. & McLeod, K.  
  70
Effect of colostrum type on serum gamma globulin concentration, growth and health of goat kids until three months
Iepema, G., Eekeren, N. van & Wagenaar, J.P. 74

Control of bovine sub-clinical mastitis by using herbal extract during lactation
Giacinti, G., Rosati, R.*, Borselli, C.*, Tammaro, A.*, Ametiste, S.* & Ronchi, B. 78

Mastitis incidence and milk quality in organic dairy farms which use suckling systems in calf rearing
Wagenaar, J.P.T.M. & Smolders, E.A.A. 82

Dry cow therapy in an organic dairy herd of a milk and a dual purpose breed
Barth, K. 86

Incidence of anthelmintic resistance in cattle farms in Northern Germany – first results
Kleinschmidt, N., Samson-Himmelstjerna, G. von, Demeler, J. & Koopmann, R. 90

Effects of red clover and maize silages on the carriage of gut pathogens in steers

Experiences of Veterinarians Using Acupuncture on Farm Animals
Trej, G., Brandt, B. & Hörning, B. 97

Growth performance of broilers fed with different strains of probiotics
Tarun, M. 101

**Welfare and production of organic sows and piglets** 105

Prolonged suckling period in organic piglet production – Effects on some performance and health aspects
Bussemäs, R. & Weissmann, F. 106

Group suckling in organic sow units
Früh, B., Hagemüller, W., Aubel, E., Simantke, C., Schwarz, P. & Baumgartner, J. 110

Development of a mobile organic piggery for outdoor pork production – function, productivity, animal behaviour and environmental risk assessments
Salomon, E., Andreessen, N., Gustafsson, M., Nyman, M., Ringmar, A. & Tersmeden, M. 114

Effect of additional heating, floor length, straw quantity and piglet nest accessibility on piglet losses in organic farrowing pens
Vermeer, H.M. & Houwers, H.W.J. 118

Towards loose housing in Swedish organic dairy production
Swensson, C. 122

Excreting behaviour of pigs from organic housing systems in relation to ammonia emission

Profitability of Sow husbandry in organic farming – Performance and construction costs for group housing of lactating sows
Lange, K. & Möller, D. 130

Relationships between sow and piglet traits in organic production outdoors and indoors
Wallenbeck, A. & Rydhmer, L. 134
Effects of silage or probiotics on performance and gut microbial composition of organic growing-finishing pigs
Nagel, P., Domig, K. J., Hagmüller, W., Pfalz, S., Kronsteiner, S., Ortner, B., Sundrum, A. & Zollitsch, W.

Prolonged suckling period in organic piglet production – effects on selected immunological parameters
Ahrens, F., Pollmüller, T., Sünkel, Y., Bussemes, R., Weissmann, F. & Erhard, M. H.

Antimicrobial effect of dietary nitrate in weaning piglets challenged or not with Salmonella enterica serovar typhimurium
Modesto, M., D’Aimmo, M.R., Stefanini, I., Mazzoni, M., Bosi, P. & Biavati, B.

Organic ruminant feeding
How can the organic dairy farmer be self-sufficient with vitamins and minerals?
Mogensen, L., Kristensen, T., Søegaard, K. & Jensen, S.K.

Production of grain legume crops alternative to soya bean and their use in organic dairy production
Martini, A., Migliorini, P., Lorenzini, G., Lotti, C., Rosi Bellière, S., Squilloni, S., Riccio, F., Giorgetti, A. & Casini, M.
A discussion of norms for S supply in organic farming based on content in forage and ruminant performance in Norway
Hansen, S., Bakken, A.K.

Pisum sativum as alternative protein source in diets for buffalo cows in middle and late stage of lactation
Masucci, F., Di Francia, A., De Rosa, G., Romano R., Varriacchio M.L. & Grassi, C.

Rearing improvement in organic Maremmana beef production: “in vivo” performance and carcass characteristics.
Pauselli, M., Mele, M., Morbidini, L., Cozza, F. & Pollicardo, A.

Indigenous sheep breeds in organic livestock production in karst areas of Croatia
Radin, L., Šimpraga, M., Vojta, A., Marinculić, A.

Quality of organically grown protein crops in Norway for livestock concentrates – limited N and S supplementation
Henriksen, B.I.F. & Prestløkken, E.

Use of grass and red clover silage mixtures for milk production and whole-body N partitioning by dairy cows
Moorby, J.M., Ellis, N.M., Fisher, W.J., Davies, D.R. & Scollan, N.D.

Effects of mixing red clover and maize silages on milk production and whole-body N partitioning in dairy cows

Animal health, product quality and strategies for organic pork production

Strategies for a diversified organic pork production
Kongsted, A.G, Claudi-Magnussen, C., Hermansen, J.E. & Andersen, B.H.
Influence of amino acid level and production system on performance, health and behaviour in organic growing pigs
Høøk Prestø, M., Andersson, H.K., Wallgren, P. & Lindberg, J.E.

Effects of a feeding strategy to increase intramuscular fat content of pork under the conditions of organic farming
Abel, S., Weissensteiner, R., Marien, C., Zollitsch, W. & Sundrum, A.

Occurrence of intestinal helminths in two organic pig production systems
Lindgren, K., Lindahl, C., Höglund, J. & Roepstorff, A.

Multi criteria assessment of livestock systems
Organic livestock production - trapped between aroused consumer expectations and limited resources
Sundrum, A.

Is automatic milking acceptable in organic dairy farming? Quantification of sustainability indicators
Oudshoorn, F.W. & de Boer, I.J.M.

Environmental Impacts and Economic Differences in grassland based Organic Dairy Farms in Germany – Modelling the Extremes
Müller-Lindenlauf, M., Deitert, C & Köpke, U.

Impact of the drought on the fodder self-sufficiency of organic and conventional highland dairy farms
Boisdon, I. & Capitaine, M.

Comparison of Organic and Conventional Beef-Suckler Farms in Germany
Hörning, B., Feige, M. & Dollinger, J.

Agripolicy: Institutions and implementations
Toward Regionalized Models of Organic Food Production and Marketing in the US: The Case of Michigan (USA)
Bingen, J., Martinez, L. & Conner, D.

Institutions and Policy Development for Organic Agriculture in Western Balkan Countries: a Cross-Country Analysis
Hamade, K., Midmore, P. & Pugliese, P.

Impact of agricultural liberalisation on the relative importance of price premiums for the profitability of organic farming
Sanders, J., Stolze, M. & Lampkin, N.

Potential implementation problems of the EU OAP: a failure mode and effects analysis
Vairo, D. & Zanoli, R.

Public support for organic food and Production, Promotion and Action Plans in Spain
Gonzálvez, V. & Moreno, J.L.

Development of criteria and procedures for the evaluation of the European Action Plan of Organic Food and Farming
Schmid, O., Lampkin, N., Jeffreys, I., Dabbert, S., Eichert, C., Michelsen, J., Zanoli, R. and Vairo, D., Gonzalvez, V.
Understanding the organic consumer
Understanding the Organic Consumer through Narratives: an International Comparison
Consumers willingness to pay for Fair trade and organic products
Sirieix, L. & Tagbata, D.
The US Organic Food Shopper
Zepeda, L.
The EU health claims regulation and its impact on the marketing of organic food
Aschemann, J., Maroschek, N. & Hamm, U.
Consumers and their impact on food and farming systems in North America and Germany – Examples relating to GMO issues
Pick, D.
Consumers motivations for buying local and organic products in developing vs developed countries
Sirieix, L., Kledal, P. & Santiago de Abreu, L.
Influence of Young Children (3-6 years) on Organic Food Consumption in their Families
Freyer, B. & Haberkorn, A.

Public procurement: constraints and barriers
Overcoming constraints and barriers for organic public procurement – Applying the theory of loosely coupled systems to the case of organic conversion in Danish municipalities
Mikkelsen, B.E.
Juveniles’ organic food preferences and how parents deal with them
Riefer, A. & Hamm, U.
The successful use of organic food products in eating out: A German case study
Rueckert-John, J.
iPOPY – innovative Public Organic food Procurement for Youth. School meals – and more!

Economics and strategies on organic farms
Do organic livestock farms in Switzerland earn higher work incomes?
Lips, M.
Gender Effects on Adoption of Organic Weed Management Techniques
Lohr, L. & Park, T.A.
Financial success of organic farms in Germany
Nieberg, H. & Offermann, F.
Diversification and specialisation as development strategies in organic farms
Zander, K.
The Impact of Labor and Hiring Decisions on the Performance of U.S. Organic Farms
Lohr, L. & Park, T.A. 320

Factors explaining farmers’ behaviours and intentions about agricultural methods of production. Organic vs. conventional comparison
Canavari, M., Lombardi, P., & Cantore, N. 324

An integrated approach project for the revaluation of a traditional sourdough bread production chain
Piazza, C., Giudici, P., Corbellino, M., Gianinetti, A., Morcia, C. & Terzi, V. 328

The impact of mycorrhizal symbiosis on tomato fruit quality
Salvioli, A., Novero M., Lacourt, I. & Bonfante, P. 332

New approaches in consumer research 337

Information Acquisition Behaviour of Fair-Trade Coffee Consumers – a Survey by Means of an Information Display Matrix
Aschemann, J. & Hamm, U. 338

Evaluating trust in organic quality marks: a network approach using laddering data
Gambelli, D. & Naspetti, S. 342

Identifying the gap between stated and actual buying behaviour on organic products based on consumer panel data
Niessen, J. & Hamm, U. 346

Organic Certification and Livelihood 351

Impact of the adoption of participatory guarantee systems (PGS) for organic certification for small farmers in developing countries: the case of
Zanasi, C. & Venturi, P. 352

Participatory Guarantee Systems
New Approaches to Organic Certification - The Case of Mexico
Nelson, E., Gómez Tovar, L, Schwentesius, R & Gómez Cruz, M. 356

The Circular Economy of a Local Organic Food Chain: Xiedao in Beijing
Yuexian, L., Høgh-Jensen, H. & Egelyng, H. 360

Organic Agriculture: A New Field of International Development Policy
Egelyng, H., Høgh-Jensen, H., Kledal, P.R. & Halberg, N. 364

The institutionalization of Participatory Guarantee Systems (PGS) in Brazil: organic and fair trade initiatives
Fonseca, M.F. de A.C., Wilkinson, J., Egelyng, H. & Mascarenhas, G.C.C. 368

Challenges for standards and certification 373

The Differentiation Process in Organic Agriculture (OA) – between Capitalistic Market System and IFOAM Principles
Freyer, B. 374

Dropping organic certification - effects on organic farming in Norway
Køesling, M., Løes, A.K., Flaten, O. & Lien, G. 378
Analysis of differences between EU Regulation (EEC) 2092/91 in relation to other national and international standards
Schmid, O., Huber, B., Ziegler, K., Jespersen, L.M. & Plakolm, G.
Organic operators' satisfaction with their certification body – a survey in Germany
Zorn, A. & Renner, H.

CERTCOST – Economic Analysis of Certification Systems for Organic Food and Farming at EU level
Dabbert, S., Lippert, C., Schulz, T. & Zorn, A.

IFOAM principles in the light of different ethical concepts
Freyer, B.

Organic sector relationships

Labour Quality Model for Organic Farming Food Chains
Gassner, B., Freyer, B. & Leitner, H.

Collaborative relationships in the organic wheat supply chain: a case study on three EU Countries
Naspetti, S., Paladini, M.E., Bteich, M.R. & Zanoli, R.

Strategies to Induce Cooperation from Farmers in an Organic Food Supply Chain: the Case of Bio Market, Inc., Japan
Taniguchi, Y.

Price Premiums for Organic Food from Australia and China
Paull, J.

Corporate Social Responsibility and Organic Farming –Experiences in Austria
Goessinger, K. & Freyer, B.

Factors Affecting Market Outlet Use by U.S. Organic Handlers
Oberholtzer, L., Dimitri, C. & Lohr, L.

Opportunities for small organic shops despite the rise of organic supermarkets
Runge, S., Corneli, M. & Häring, A.M.

The German organic sector from the perspective of social-ecological research on agriculture and nutrition
Nölting, B.

The Prospects of Organic Agriculture Development in the Chosen Regions of Poland – Podkarpacie and Kurpie.
Kucińska, K., Pelc, J., Golba, J. & Popławska, A.

Agromere: how to integrate urban agriculture in the development of the Dutch city of Almere?
Jansma, J.E., Visser, A.J., de Wolf, P. & Stobbelaar, D.J.

The New 'Local': A Global Review of Using Geographical Indications
Giovannucci, D.

Organic Marketing and organisation in developing countries

Shaded Coffee: A way to Increase Sustainability in Brazilian Organic Coffee plantations
Moreira, C.F., De Nadai Fernandes, E. & Tagliaferro, F.S.
Consumers’ Awareness, Demands and Preferences for Organic Vegetables: A Survey Study in Shiraz, Iran
Alizadeh, A., Javanmardi, J., Abdollahzadeh, N. & Liaghat, Z.

Market Integration Shape Organic Farmers’ Organisation

Accessing the World Market for Organic Food and Beverages from Nigeria
Olabiyi, T. I., Okusanya, A. O. & Harris, P. J. C.

Perceived Constraints and Opportunities for Brazilian Smallholders Going Organic: a case of coffee in the state of Minas Gerais
Nordlund, E. D. & Egelyng, H.

Socio-Economic Effects of Organic Agriculture in Africa
Lyons, K. & Burch, D.

Cross-disciplinary Studies in Livelihood impacts of Organic Agriculture
Agroforestry systems and food security among smallholder farmers of the Brazilian Amazon: A strategy for environmental global crisis
Abreu, S. de L. & Watanabe, M. A.

Organic agriculture and rural livelihoods in Karnataka, India
Lukas, M. & Cahn, M.

Impacts of Institutional Arrangements on the Profitability and Profit Efficiency of Organic Rice in Thailand
Setboonsang, S., Leung, P. S. & Cai, J.

Organic Agriculture as Livelihood Strategy: A Case Study in a Rural Community of Southern Brazil
Moreno-Peñaranda, R. & Egelyng, H.

Profitability of Organic Agriculture in a Transition Economy: the Case of Organic Contract Rice Farming in Lao PDR
Setboonsang, S., Stefan, A., Leung, P. S. & Cai, J.

Ancestral Livelihoods in Amazon River Floodplains
Madaleno, I.

Consumers in a food chain perspective
Consumers perceptions of combined “fair trade” and “organic agriculture” labels on food products
Daniel, M., Sirieix, L. & Bricas, N.

Are Organic Consumers Healthier than Others?
Krarup, S., Christensen, T. & Denver, S. 2

Consumers Values and Motives regarding Organic Food Products in Poland
Zakowska-Biemans, S.

Exploring close consumer-producer links to maintain and enhance on-farm biodiversity
Consumer Appreciation of Carcass Quality of Organic vs Conventional Suckling Lamb Production
Palacios, C., Revilla, I., Vivar-Quintana, A.M., Lurueña-Martínez, M.A., & Severiano-Pérez, P.

Producers and Consumers Relationship Strategies in the Organic Market in Brazil
Darolt, M.R. & Constanty, H.

Food for Thought about Environmental Values and Food Demand
Henseleit, M.

Marketing from multiple perspectives
Local food networks and the change of the agrofood system
Lamine, C.

Direct marketing of beef in organic suckler cattle farms: economic results and impact on breeding system management
Veysset, P., Ingrand, S. & Limon, M.

Innovations within the organic food sector – basis for novel business relations between agricultural and processing enterprises
Gottwald, F. Th. & Boergen, I.

Development of organic farming in Central and Eastern European countries
Hrabalova, A. & Wollmuthova, P

Construction of prices for organic products enhancing farmers’ profiles diversity in the South East of France
Lauvie, P. & Bellon, S.

Carbon storage and energy use
Carbon sequestration in organic and conventional managed soils in the Netherlands
Sukkel, W., Geel, W. van & Haan, J.J. de

Should organic farmers be rewarded for sequestering C in soil?
Cooper, J.M. & Melchett, P.

A comparison of energy use in organic and conventional agriculture in Spain
Alonso, A.M., González, R., Foraster, L., Guzmán, G.I. & García, R.

The Comparative Energy Efficiency of Organic Farming
Azeez, G.S.E & Hewlett, K.L.

Impact of different Agricultural Systems and Patterns of Consumption on Greenhouse-Gas Emissions in Austria
Freyer, B. & Weik, S.

Emission of Climate-Relevant Gases in Organic and Conventional Cropping Systems
Küstermann, B. & Hülsbergen, K.J.

Can Organic Farming Contribute to Carbon Sequestration? A Survey in a Pear Orchard in Emilia-Romagna Region, Italy
Ciavatta, C., Gioacchini, P., & Montecchio, D.
Energy efficiency of biomass production in managed versus natural temperate forest and grassland ecosystems
Callesen, I. & Østergaard, H.

Wood Chips from Hedgerows – Biomass Potential for On-Farm Mulching and Bioenergy?
Gruber, S. & Claupein, W.

Does Organic Farming have Greater Potential to Adapt to Climate Change?
Niggli, U., Hepperly, P., Fliessbach, A., and Mäder, P.

Biogas in Organic Agriculture

Effects of Biogas Digestion of Slurry, Cover Crops and Crop Residues on Nitrogen Cycles and Crop Rotation Productivity of a Mixed Organic Farming System
Möller, K., Stinner, W. & Leithold, G.

Biogas in stockless organic Farming: Effects of Digestion of Clover/grass, Cover Crops and Crop Residues on Nitrogen Cycles and Crop Rotation Productivity
Stinner, W., Möller, K. & Leithold, G.

Energy balance of different organic biogas farming systems
Heitbig, S., Küstermann, B. & Hülsbergen, K.J.

Biogas and Organic Farming: Empirical evidence on production structure and economics in Germany
Anspach, V. & Möller, D.

A New Lease on Life for Marginal Farmland: Convergence of Prairie Restoration with Biofuel Production
Borsari, B. & Onwueme, I.

Food safety and quality management

Effect of cultivar and soil characteristics on nutritional value in organic and conventional wheat
Murphy, K., Hoagland, L., Reeves, P. & Jones, S.

A multidisciplinary approach to improve the quality of organic wheat-bread chain
Abécassis, J., David, C., Fontaine, L., Taupier-Létage, B. & Viaux, P.

Organic vs Conventional Suckling Lamb Production: Product Quality and Consumer Acceptance
Revilla, I., Vivar-Quintana, A.M., Lurueña-Martínez, M.A., Palacios, C & Severiano-Pérez, P.

Animal welfare and food safety: danger, risk and the distribution of responsibility
Kijlstra, A. & Bos, A.P.

Biodiversity assessment and management

Impact of Organic Crop and Livestock Systems on Earthworm Population Dynamics
Kotcon, J.B.
Eco-Regions: How to link organic farming with territorial development
Schermer, M. & Kirchengast, Ch.
Effects of landscape agricultural intensification and management on weed species richness in the edges of dryland cereal fields.
Comparative analysis of conventional and organic farming systems: Diversity and abundance of farmland birds
Neumann, H., Loges, R. & Taube, F.
The use of mulch to increase Spider (Arachnidae) numbers; a habitat approach to biological insect control
Manns, H.R., Murray, D.L. & Beresford, D.V.

Working with biodiversity in OA
Enhancing Biodiversity and Multifunctionality of an Organic Farmscape in California’s Central Valley
Diversity as a key concept for organic agriculture
Neumann, H., Loges, R. & Taube, F.
The use of mulch to increase Spider (Arachnidae) numbers; a habitat approach to biological insect control
Manns, H.R., Murray, D.L. & Beresford, D.V.

Working with biodiversity in OA
Enhancing Biodiversity and Multifunctionality of an Organic Farmscape in California’s Central Valley
Diversity as a key concept for organic agriculture
Neumann, H., Loges, R. & Taube, F.
The use of mulch to increase Spider (Arachnidae) numbers; a habitat approach to biological insect control
Manns, H.R., Murray, D.L. & Beresford, D.V.

Working with biodiversity in OA
Enhancing Biodiversity and Multifunctionality of an Organic Farmscape in California’s Central Valley
Diversity as a key concept for organic agriculture
Neumann, H., Loges, R. & Taube, F.
The use of mulch to increase Spider (Arachnidae) numbers; a habitat approach to biological insect control
Manns, H.R., Murray, D.L. & Beresford, D.V.

Enhancing Biodiversity and Multifunctionality of an Organic Farmscape in California’s Central Valley
Diversity as a key concept for organic agriculture
Neumann, H., Loges, R. & Taube, F.
The use of mulch to increase Spider (Arachnidae) numbers; a habitat approach to biological insect control
Manns, H.R., Murray, D.L. & Beresford, D.V.
Multi criteria assessment of experiments
A pilot socio-economic analysis of QLIF dairy projects
Sustainability evaluation of long term organic farm systems
Vazzana C., Raso E. & Migliorini P.
Evaluation of Farm Biodiversity with Indicators in the Context of Sustainability
Siebrecht, N. & Hülsbergen, K.J.
On the inherent instability of the monoculture
Griffon, D. & Torres-Alruiz, M. D.

Methods in organic quality research
Effect of organic and conventional feed on potential biomarkers of health in a chicken model
Huber, M., Van de Vijver, L, De Vries, A., Nierop, D., Adriaansen-Tennekes, R.,
Parmentier, H., Savalkoul, H., Coulier, L., Vorheij, E., Freidig, A.,
Van der Gref, J. & Hoogenboom, R.
The effect of medium term feeding with organic, low input and conventional diet on selected immune parameters in rat
Baranska, A., Rembiialkowska, E., Lueck, L. & Leifert, C.
Potential of X-Ray Spectrometry and Chemometrics to Discriminate Organic from Conventional Grown Agricultural Products
Authenticity tests of organic products (Golden Delicious and Elstar) applying sensory analysis
Ploeger, A., Röger, M. & Weibel, F.
Effect of wheat production system components on food preference in rats
Lueck, L., Velimirov A., Shiell, R.S., Cooper, J.M. & Leifert, C.
Quality of organic feedstuffs grown in Trethorst (Germany) – evaluated by Near Infrared Reflectance Spectroscopy
Aulrich, K. & Böhm, H.
Application of standardised biocrystallization on milk and butter samples
Kahl, J., Busscher, N., Merkertl, G. & Ploeger, A.
Authentication of organic wheat samples from a long-term trial using biocrystallization
Kahl, J, Busscher, N, Merkertl, G, Mader, P, Dubois, D & Ploeger, A
Organic wheat quality from a defined Italian field-trial
Kokornaczyk, M., Kahl, J., Roose, M., Busscher, N. & Ploeger, A.
Organic beef production by Maremmana breed: qualitative meat characteristics
Mele, M., Morbidini, L., Cozza, F., Pauselli, M. & Pollicardo, A.
Organic vs. Conventional Field Trials: the Effect on Cauliflower Quality
Health and Safety of organic products  

Feed composition and strategies to improve poly-unsaturated fatty acid levels in organic cow milk  

De Wit, J. & de Vries, A.

Influence of cropping systems on the potential formation of acrylamide in different cultivars of wheat  

Stockmann, F., Graeff, S., Weber, A. & Claupein, W.

Effects of weed management strategies on quality and enteric pathogen contamination of organic lettuce  

Fischer-Arndt, M. T., Neuhoff, D. & Köpke, U.

Pilot scale application of ozonated water wash – effect on microbiological and sensory quality parameters of processed iceberg lettuce during shelf-life  

Särkkä-Tirkkonen, M., Leskinen, M. & Ölmez, H.

Protein quality and content of nitrite, nitrate and metals in commercial samples of organic and conventional cold meats.  

Barbieri, G., Macchiavelli, L. & Rivaldi, P.

Survey of acaricide residues in Italian organic and conventional beeswax  

Costa, C., Lodesani, M., Serra G., Colombo R. & Sabatini A.G.

Occurrence and level of patulin contamination in conventional and organic apple juices marketed in Italy  

Spadaro, D., Ciavarella, A., Frati, S., Garibaldi, A. & Gullino, M.L.

Sensory evaluation of processed wheat from a defined field-trial (QualityLowInputFood)  

Ploeger, A., Röger, M., Lueck, L. & Leifert, C.

Potential Risk of Acrylamide Formation in Different Cultivars of Amaranth and Quinoa  

Bioactive compounds of organic plant products  

Cultivation and analysis of anthocyanin containing types of potatoes in organic farming regarding cultivability and additional health benefits  

Huang, B., Herrmann, M.E., Hillebrand, S., Winterhalter, P., Schliephake, U. & Trautz, D.

The Content of Selected Antioxidant Compounds in Bell Pepper Varieties from Organic and Conventional Cultivation Before and After Freezing Process  

Hallmann E. & Rembialkowska E.

Bioactive compounds in tomatoes: effect of organic vs conventional management in Parma in 2006  

The antioxidant compounds in rat experimental diets based on plant materials from organic, low-input and conventional agricultural systems  

Wiśniewska, K., Rembialkowska, E., Hallmann, E., Rusaczon, A., Lueck, L. & Leifert, C.
Antioxidant Activity of Vegetables from Different Management Systems
Maggio, A., De Pascale, S. & Barbieri, G.
The impact of medium term feeding diets from four management systems on body composition and plasma corticosterone concentration in male rats
Królikowski, T., Gromadzka-Ostrowska, J., Rembiałkowska, E., Lueck, L. & Leifert, C.
Influence of fertilisation on furanocoumarins content in two celeriac varieties
Schulzová, V., Botek, P., Hajšlová, J., Babička, L., Kořímská, L. & Václavíková, K.

Workshops of the 4th QLIF Congress
QLIF Workshop 1: Product quality in organic and low input farming systems
Lueck, L., Brandt, K., Seal, C., Rembiałkowska, E., Huber, M., Butler, B., Bennett, R., Oughton, L., Nicholas, P., Kretzschmar, U., Sundrum, A. & Leifert, C.
QLIF Workshop 2: Safety of foods from organic and low input farming systems

Preface

To carry home these heavy two volumes of ISOFAR’s 2nd Scientific Conference Proceedings might give rise to the question whether these books represent more mass than class and if they are still topical.

After all the author must wonder whether a contribution in a peer-reviewed proceedings volume is worthwhile when there is the alternative of publishing it in a highly ranked scientific journal with the same effort. Moreover, the editors as well as the numerous referees might have felt desperate at times due to the enormous amount of time and strength they invested to compile about 400 selected papers.

I would like to thank all of you for your effort. It was worthwhile due to the reader now obtains a valuable overview of the current state of knowledge and research aims of the scientifically based Organic Agriculture which might be important not only for the scientist but also for all other stakeholders interested in the further development of Organic Agriculture.

I owe gratitude to all who contributed to coping with this laborious task. You have all done a tremendous job in contributing to foreseen successful scientific modules held under ISOFAR’s and IFOAM’s joined conference/congress umbrella. Our collective hope is that these proceedings will represent a significant milestone on the road towards a better understanding of the potentials and effects capabilities of a scientifically based Organic Agriculture can have.

Prof Dr Ulrich Köpke

President ISOFAR
Dear Reader,

The two volumes of the Proceedings of the Second Scientific Conference of the International Society of Organic Agriculture Research, 'Cultivating the Future Based on Science', represent a considerable part of the worldwide increase in research activities in Organic Agriculture (OA). This observation is in accordance with the overall trend, at least in much of the western world, of increased production and consumption of certified organic products.

In all, 495 four-page papers were submitted to the conference, and all went through a sophisticated review process resulting in 380 papers being selected for presentation at the ISOFAR Conference. Evaluating papers is a difficult task, requiring a sure scientific instinct. It also requires a reasonable judgement of the quality of the language of each paper; since a paper’s language is part of what determines its overall quality, even though this gives an unjustified advantage to native speakers of English. Supported by a review form that checked various aspects of the paper’s quality, the reviewers tried their best to ensure maximum transparency of the evaluation, which basically reflected the objective of improving the paper’s quality.

The first volume deals mainly with various aspects of organic crop production, which traditionally represent the largest share of all papers submitted to conferences on OA. We hope that you will find it interesting to discover the diverse research approaches regarding the management of organic crops. While a tendency to a more problem-oriented approach realized by specialists is evident, as perhaps is to be expected, there is still a strong foundation of papers on traditional agronomy with a systemic approach, which remains a key discipline in OA research. Attentive readers will realize that the diversity of papers also reflects the global differences with respect to an understanding of what OA is.

This second volume gives insights into the increasing research activities on animal husbandry, socio-economics, interdisciplinary research projects, and QLIF workshops, all related to OA. We gratefully acknowledge in particular the increasing interest in organic animal husbandry, which in the past was a poor cousin in OA research. Some topical issues such as global warming and energy supply are discussed in the interdisciplinary sessions.

The scientific committee agreed at the start that cross-disciplinary papers should be given high priority because of the very nature of organic farming and food systems. For many years we have claimed there was a need for a holistic understanding of OA, both because of the interdependencies among sub-systems on the farm (soil-crops-livestock-people) and because of the multiple objectives behind OA (producing wholesome food, conserving soil fertility, maintaining biodiversity, supporting animal welfare, reducing pollution, etc.). However, most often researchers end up meeting and discussing these matters in largely discipline-oriented sessions, even at most organic conferences. Therefore, we wanted to encourage a more cross-disciplinary approach at this ISOFAR event, and we were happy to receive a large number of papers for the cross-disciplinary topics. We hope this tendency will be strengthened in future organic conferences.

Moreover, the great number of papers submitted for the scientific part of the OWC clearly demonstrates the interest in sharing research-based knowledge within the organic sector. To achieve this, it was important to have a section of the OWC where strict methodological approaches are required for participation.
On the other hand, it is a pleasure and an advantage for a scientific conference to be part of a global event that attracts the whole sector and thus allows the researchers to disseminate their findings widely and gain inspiration from other stakeholders in the organic movement.

First and foremost many thanks to all authors who contributed to our joint conference. We also are greatly indebted to the numerous reviewers listed on the next page, who did a first-class job in evaluating hundreds of papers. It was a great pleasure to cooperate with Paola Bonfreschi from the OWC – Organizing Committee, who is the embodiment of reliability and politeness. Last but not least, many thanks to Anja Schneider, of the ISOFAR Head Office, who was mainly in charge of overall communication with the authors and substantially supported the editing of the proceedings.

Managing the review process and editing the proceedings for an international conference is a challenging task in which language difficulties and technical problems may sometimes result in confusion. We kindly ask you to accept our apologies for any problems you may encounter.

We sincerely hope that the Proceedings of the Second Scientific Conference of ISOFAR ‘Cultivating the Future Based on Science’ will be an important and worthwhile source of information and inspiration for you.

On behalf of the Editors,
Daniel Neuhoff, Niels Halberg, Thomas Alföldi & William Lockeretz
Acknowledgements
