The 16th edition of 'The World of Organic Agriculture', was published by FiBL and IFOAM in February 2015.*

Contents:

› Results of the survey on organic agriculture worldwide;
› Organic agriculture in the regions and country reports;
› Australia, Canada, the Pacific Islands, Mediterranean region, and The United States of America.
› Chapters on the global market, standards & legislations, voluntary standards, PGS, European market and vegetables production in China.
› Numerous tables and graphs.
› The book can be ordered via IFOAM.bio and shop.FiBL.org.

- Graphs & Maps
- Data revisions
- News and background information
About this presentation

› There are 3 presentations summarizing the key results of the FiBL-IFOAM survey on organic agriculture worldwide 2015 (data 2013). Apart from the global data, key results on crop and on regional data are presented.

› More information is available at www.organic-world.net

› The following three presentations are available at http://www.organic-world.net/yearbook/yearbook2015/slide-presentations.html:

› Part 1: Global data 2013 and survey background
› Part 2: Land use and key crops in organic agriculture 2013
› Part 3: Organic agriculture in the regions 2013
The 16th Survey on organic agriculture worldwide

- The 16th survey on organic agriculture worldwide was carried out by the Research Institute of Organic Agriculture FiBL in cooperation with the International Federation of Organic Agriculture Movements (IFOAM – Organics International) and further partners.
- The survey was carried out between July 2014 and February 2015.
- Data were received from 170 countries.
- New countries included: Andorra, Bahamas, Iraq, Mayotte.
- Updated data on area and producers were available for 129 countries.
- Data were provided by almost 200 country experts (representatives from NGOs, certification bodies, governments, researchers).
- The following data were collected: Area data (including land use and crop details); Producers, other operator types; Domestic market values; Export and imports data; Livestock data (animal heads and production tones);
- The results are published in the yearbook “The World of Organic Agriculture 2015” and at www.organic-world.net.

Organic agriculture in Africa 2013

› In Africa, there were 1.2 million hectares of certified organic agricultural land (data 2013).
› This constitutes about three percent of the world’s organic agricultural land.
› More than 572’000 producers were reported.
› The countries with the most organic land are Uganda (230’232 hectares), Tanzania (186’537 hectares), and Ethiopia (160’987 hectares).
› The highest shares of organic land are in Sao Tome and Prince (7.2 percent), Egypt (2.3 percent), and Comoros (1.7 percent).
› The majority of certified organic produce in Africa is destined for export markets.
› The European Union, as the major recipient of these exports, is Africa’s largest market for agricultural produce.

Organic Agriculture in Asia – Key Figures 2013

› The total organic agricultural area in Asia was 3.4 million hectares in 2013.
› This constitutes eight percent of the world’s organic agricultural land.
› There were more than 0.7 million producers reported.
› The leading countries by organic agricultural land are China (2.1 million hectares) and India (0.5 million hectares).
› Timor-Leste has the most organic agricultural area as a proportion of total agricultural land (almost seven percent).

Organic agriculture in Europe: Key data/indicators 2013

› 11.5 million hectares of agricultural land are organic (including in conversion areas).
› This constitutes 2.4 percent of the agricultural land in Europe.
› The organic agricultural land increased by 0.18 million hectares or three percent in 2013.
› More than 330’000 producers were reported.
Organic agriculture in the European Union: Key data/indicators 2013

› 10.2 million hectares of agricultural land are organic (including in conversion areas).
› This constitutes 5.7 percent of the agricultural land in the European Union.
› The organic agricultural land increased by 0.16 million hectares or three percent in 2013.
› Almost 260’000 producers were reported.
Organic market in Europe: Key data/indicators 2013

› The European market was 24.3 billion euros; six percent more than in 2012.

› The largest market for organic products in 2013 was Germany with a turnover of 7.6 billion euros, followed by France (4.4 billion euros) and the UK (2.2 billion euros).

› As a portion of the total market share, the highest levels have been reached in Denmark, Austria and Switzerland, with six percent or more for organic products. The highest per capita spending is also in these countries and in Luxembourg.

Latin America/Caribbean: Organic agricultural land by country 2013

Source: FiBL-IFOAM Survey 2015
Latin America: Key figures 2013

- In Latin America, more than 200’000 producers managed 6.6 million hectares of agricultural land organically in 2013.
- This constitutes 15 percent of the world’s organic land and 1.1 percent of the region’s agricultural land.
- The leading countries are Argentina (3.2 million hectares), Uruguay (0.9 million hectares), and Brazil (0.7 million hectares).
- The highest shares of organic agricultural land are in the Falkland Islands/Malvinas (36.3 percent), French Guiana (11.9 percent), and the Dominican Republic (9.3 percent).

Source: FiBL-IFOAM Survey 2015
Latin America: Key figures 2013

› Most organic products from Latin American countries are sold on the European, North American or Japanese markets. Popular goods are especially those that cannot be produced in these regions, as well as off-season products.

› Thus, the development of robust local markets is still a major challenge, without which the sustainability of organic production cannot be achieved. Important crops are tropical fruits, grains and cereals, coffee, cocoa, sugar, and meats. Most organic food sales in the domestic markets of the countries occur in major cities.

Organic Agriculture in North America: Key figures 2013

› In North America, 3 million hectares are managed organically, of these are two million in the United States and more than 0.8 million in Canada.

› This represents 0.7 percent of the total agricultural area in the region and 7 percent of the world’s organic agricultural land.

› In 2013, the organic market continued to grow in North America, reaching almost 27 billion euros. In Canada, the organic market grew by 10 percent in 2013, and in the United States the organic market grew by almost 11.5 percent. The United States is the largest single organic market in the world, and North America continues to be the continent with the largest organic market.

Oceania: Organic agricultural land by country 2013
Organic agriculture in Oceania: Key figures 2013

› This region includes Australia, New Zealand, and the Pacific Islands.
› Altogether, there are almost 23’000 producers, managing 17.3 million hectares. A growth of over 5 million hectares was reported in 2013. This increase should be attributed to an update of the Australian area data, where five million hectares more were reported, due to rangeland areas coming into organic production, after some years of no data updates.
› This constitutes 4.1 percent of the agricultural land in the area and almost 40 percent of the world’s organic land.
› Ninety-nine percent of the organic land in the region is in Australia (17.2 million hectares, 96 percent of which is extensive grazing land), followed by New Zealand (106’753 hectares), and Samoa (33’515 hectares).
› The highest shares of all agricultural land are in Samoa (11.8 percent), followed by French Polynesia (5.5 percent), Australia (4.2 percent) and Vanuatu (2.2 percent).
