Nitrogen efficiency on dairy farms

Sissel Hansen, Matthias Koesling, Maximilian Schüler, Gustav Fystro, Marina Azzaroli Bleken
Nitrogen flow
Nitrogen flow
Conclusions

• Increasing amount of N-purchase increased the farm N-surplus per ha, but not per unit of N-produce
• The organic farms had lower N-surplus per ha than the conventional farms, had higher N-efficiency of N-purchase on farm and lower N-surplus per unit of produce
• Large variation within farming systems
Large possibilities to improve N-efficiency
