Aim of the project:
Support the development of resilient and competitive organic pig production systems across Europe with high animal welfare and low ecological footprints.

Expected outcomes:
- Innovative solutions for the design and management of outdoor areas for growing-finishing pigs
- Best practice examples in combined systems with housing and pasture
- Practical guidelines will be offered in a number of languages

Structure of work packages (WPs)

WP1: Improved concrete outdoor runs for growing-finishing pigs
WP2: Improved health, welfare and viability in young pigs
WP3: Best practice in combined housing and pasture systems Stakeholder-driven
WP4: System resilience and ecological footprint Establishment of framework and modelling
WP5: Coordination and dissemination

Acknowledgement
The authors acknowledge the financial support for this project provided by transnational funding bodies, being partners of the H2020 ERA-net project, CORE Organic Cofund, and the cofund from the European Commission.
