**Effect of agronomic management practices on lettuce quality**

**Importance of international training and exchange**

## E-learning guideline for submission of QLIF publications to Organic Eprints

by **Lars Elsgaard**, DARCOF

At the 3rd International QLIF Congress in Hohenheim 2007, a workshop on Organic Eprints was conducted with about 20 participants. The workshop was based

partly on the powerpoint presentations "Introduction to the use and perspectives of the Organic Eprints archive" (**available** at <http://orgprints.org/10674>) and "Working with Organic Eprints" (**available** at <http://orgprints.org/8696>).

### Speakshow tutorial

As a follow-up on the workshop, a tutorial based on a simple e-learning speakshow tutorial has been developed. This tutorial can be **viewed online** and also the **text part** it self is available as a pdf document. Using a QLIF publication as an example, the tutorial speakshow in less than 5 minutes take the reader through the steps that complete a submission to Organic Eprints.

Organic ePrints

### Deposit an Organic ePrint

This tutorial will show you how to deposit a paper in the organic e-prints archive.

[See the online tutorial speakshow](#)

[See the text](#) (pdf)

### Increasing importance of the archive

The open source Internet archive for publications in organic food and farming has continued to increase both in the number of registered users (8104), deposited publications (6907) and daily visits (5192). All numbers are as by december 2007.

Currently, the archive is in use as a submission system for the papers submitted to the **2nd ISOFAR scientific congress** and the other conferences taking place at the occasion of the **IFOAM Organic World Congress** (OWC) in Modena in June 2008.

**Notes**

For the QLIF project the current status of Organic Eprints is that 84 project contributions have been made available. The contributions from individual subprojects can be accessed below.

**Front**

- **Country / Organization / Project (6812)**
  - **European Union (389)**
    - **QualityLowInputFood (84)**
      - **Subproject 1: Consumer expectations and attitudes (7)**
      - **Subproject 2: Effects of production methods (13)**
      - **Subproject 3: Crop production systems (21)**
      - **Subproject 4: Livestock production systems (20)**
      - **Subproject 5: Processing strategies (13)**
      - **Subproject 6: Transport, trading and retailing (2)**
      - **Subproject 7: Horizontal activities (5)**

Click the subprojects to see the publications.
