

Organic eprints

BÖLN

Organic eprints

Archive of research in organic
agriculture and food

- Publications
 - Refereed as well as popular
- Projects and programs
- Institutions and facilities

BÖLN

Organic eprints

Collaboration between:

International Center for Research in Organic Food Systems (Denmark)

Research Institute of Organic Agriculture FiBL (Switzerland)

BÖLN

Bundesprogramm Ökologischer Landbau
und andere Formen nachhaltiger
Landwirtschaft

Federal Scheme for Organic Farming and Other Forms of Sustainable Agriculture (Germany)

BÖLN

Organic eprints

National editors
from 22 countries

- Mainly Europe
- North and South America and Australia also represented
- Wish to include more countries

BÖLN

www.orgprints.org
– an open archive
for organic research

- More than 11,500 eprints
- Use is free of charge.
- 17,500 registered users of Organic Eprints
- 5,000 daily visits

Contents

- scientific articles
- popular articles
- conference papers
- books
- reports
- presentations
- descriptions of:
 - organisations
 - projects
 - research facilities
- teaching resources
- other research publications

objectives of Organic Eprint:

- to facilitate the communication of research papers and research proposals
- to improve the dissemination and impact of research findings
- to document the research effort

What are the benefits?

For users:

- Easy access to papers
- Direct download
- "Grey" literature (conferences etc.)
- FREE!

For authors:

- Better dissemination
- More citations

For administrators:

- Better overview of project publications

Development in number of records in Organic Eprints

Organic Eprints is # 45 in a ranking of the top 1222 repositories of the world!

- and # 19 of the top 100 in Europe.

Welcome to Organic Eprints

Organic Eprints is an international open access archive for papers and projects related to research in organic food and farming. The archive contains full-text papers in electronic form together with bibliographic information, abstracts and other metadata. It also offers information on organisations, projects and facilities in the context of organic farming research. [More about the archive.](#)

Summary

Organic agricultural land and farms as well as the global market continued to grow during 2009 as documented in the 2011 edition of "The World of Organic Agriculture".

Organic land and producers

According to the latest FiBL/IFOAM survey on certified organic agriculture worldwide (data as of end of 2009, statistical information on organic agriculture is now available from 160 countries, an increase of six countries since the 2010 survey (data 2008).

There are 37.2 million hectares of organic agricultural land (including in-conversion areas). The regions with the largest areas of organic agricultural land are Oceania (12.2 million hectares), Europe (9.3 million hectares), and Latin America (8.6 million hectares). The countries with the most organic agricultural land are Australia, Argentina, and the United States. Currently 0.9 percent of the world's agricultural land is organic. However, some countries reach far higher shares: Falkland Islands (35.7 percent), Liechtenstein (26.9 percent), and Austria (18.5 percent). Seven countries have more than ten percent organic land.

Compared with the previous survey, organic land increased by two million hectares or six percent. Growth was strongest in Europe, where the area increased by almost one million hectares. The countries with the largest increases were Argentina, Turkey, and Spain.

Next to agricultural land, there are further aspects, such as most of them before even formal collection. These areas constitute 41.9 million hectares and have increased by 10 million

Sum

The 2009 edition of this annual publication documents recent developments in global organic agriculture and provides comprehensive organic farming statistics that cover surface area under organic land use in organic systems. The book also contains information on the global market of the product, regulations, and insights into current status and emerging trends for organic agriculture by country.

EPrint Type: Book

Part or Full Programme: Part of programme/Cluster of projects

Keywords: Statistics, organic farming world-wide, land use, Africa,

Subjects: "Organics" in general > Country reports > World

Research affiliation: International Organizations > International Federation of Organic Agriculture Movements > Switzerland > FiBL > Statistics & Country Info > World > Switzerland > FiBL > Communication

National editors

- More formalized collaboration can include
 - being specifically mentioned in the archive browse structure
 - having an editor in the editorial board
 - getting opportunity to influence the future development of the archive.
- Such collaboration has the benefits of
 - greatly increasing the visibility and impact of research
 - Augmenting the documentation of the research effort.

ANSOFT – national editors?

- Only the cost of the time spent
- Free on-line training
- Participation in the editors group (on-line)
- Contact IlseA.Rasmussen@icrofs.org
