

# Global Organic Farming and Organic Markets: Programme

---

- Helga Willer (FiBL) / Minou Youssefi (SOEL)  
Global Statistics 2004
- Amarjit Sahota (Organic Monitor)  
The Global Market for Organic Food
- Bernward Geier (IFOAM)  
Challenges and Outlook
- Chair: Bernward Geier

Willer, Helga and Youssefi, Minou (2004) Global Organic Statistics 2004. Oral presentation *Biofach 2004*, Nuremburg, 19.2.2004-22.2.2004. Archived at <http://orgprints.org/00001038>

# Global Organic Statistics 2004

- Helga Willer and Minou Youssefi

# The study „The World of Organic Agriculture“

- 5th year
- Initiated by Hagen Sunder and Hubert Rottner of Biofach
- First study compiled for Biofach 2000 and presented there
- IFOAM and FiBL have actively supported the project since 2003
- 2004 edition: all chapters compiled and updated by experts
- Contents: Global statistics, global market, regulations and certification, continent reports
- Roles of partners (2004 edition)
  - SOEL – compilation of statistics
  - IFOAM – coordination of the publishing process
  - FiBL – compilation and editing of articles
  - NürnbergMesse - financial support

# Global Organic Statistics 2004

---

- Current global statistics
- Continents

Africa

Asia

Australia / Oceania

Europe

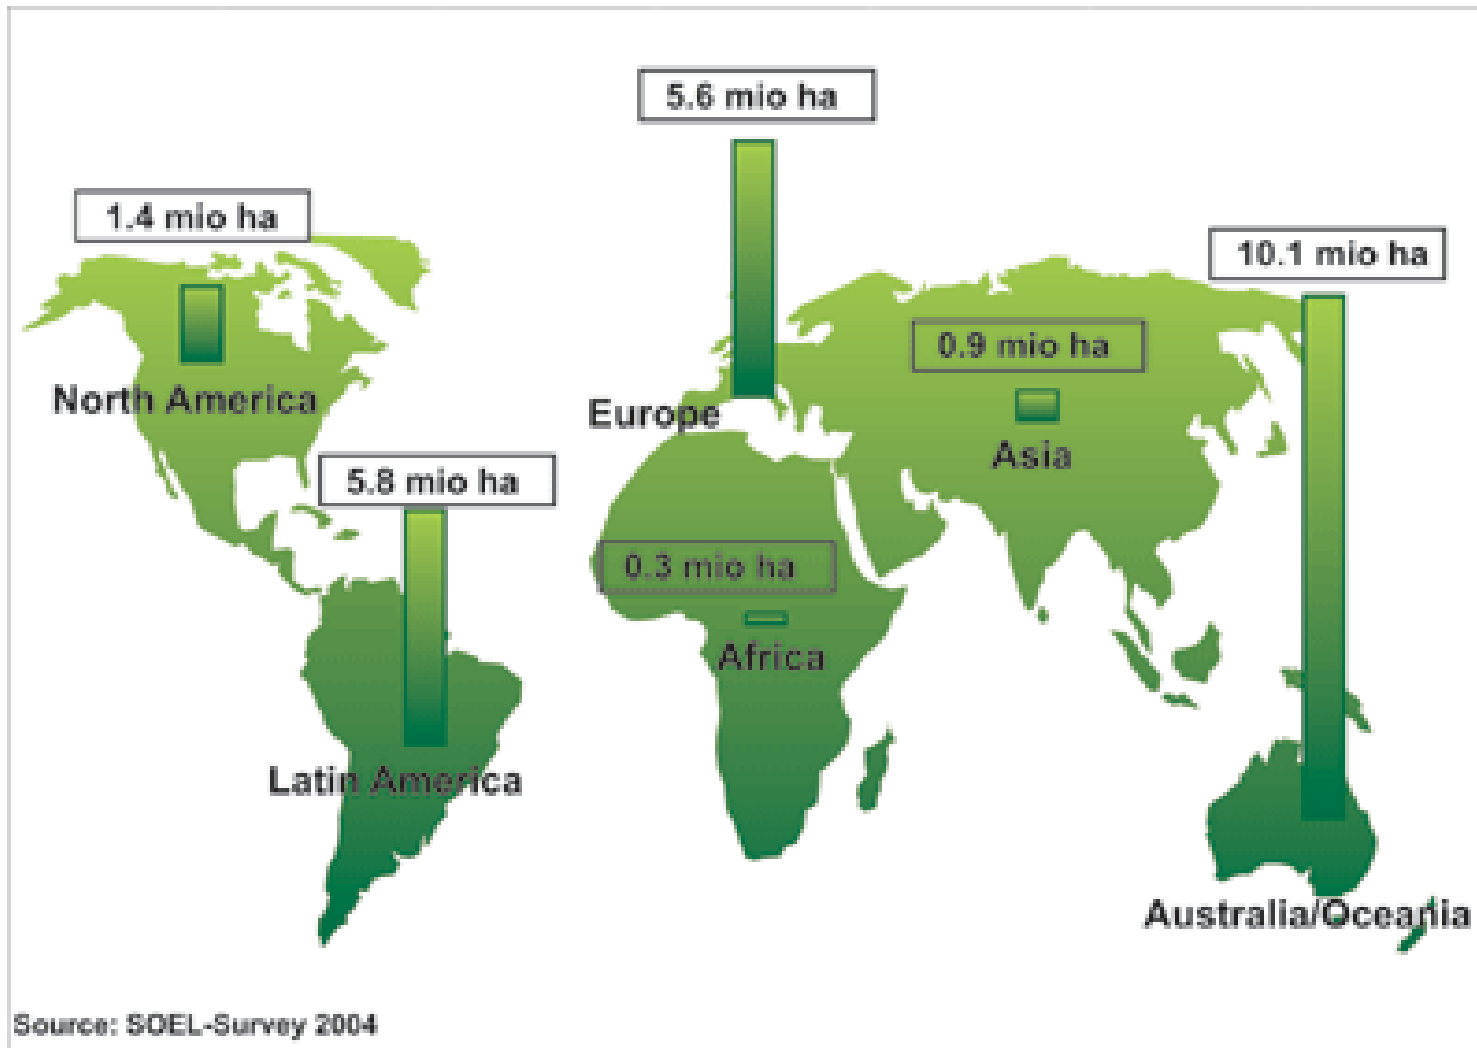

Americas

# Current Global Statistics

---

- Total certified organic area: more than 24 million hectares
- The market is 23 billion USD (Year: 2002)
- Countries with the highest area:  
Australia: 10 million ha, Argentina: almost 3 million ha,  
Italy: almost 1.2 million ha
- The proportion of organically managed land is highest in Europe

# Global Map of Organic Agriculture

# Global Organic Land by Continents

# The ten countries

## with the highest area under organic management

## The ten countries with the highest share of land under organic management

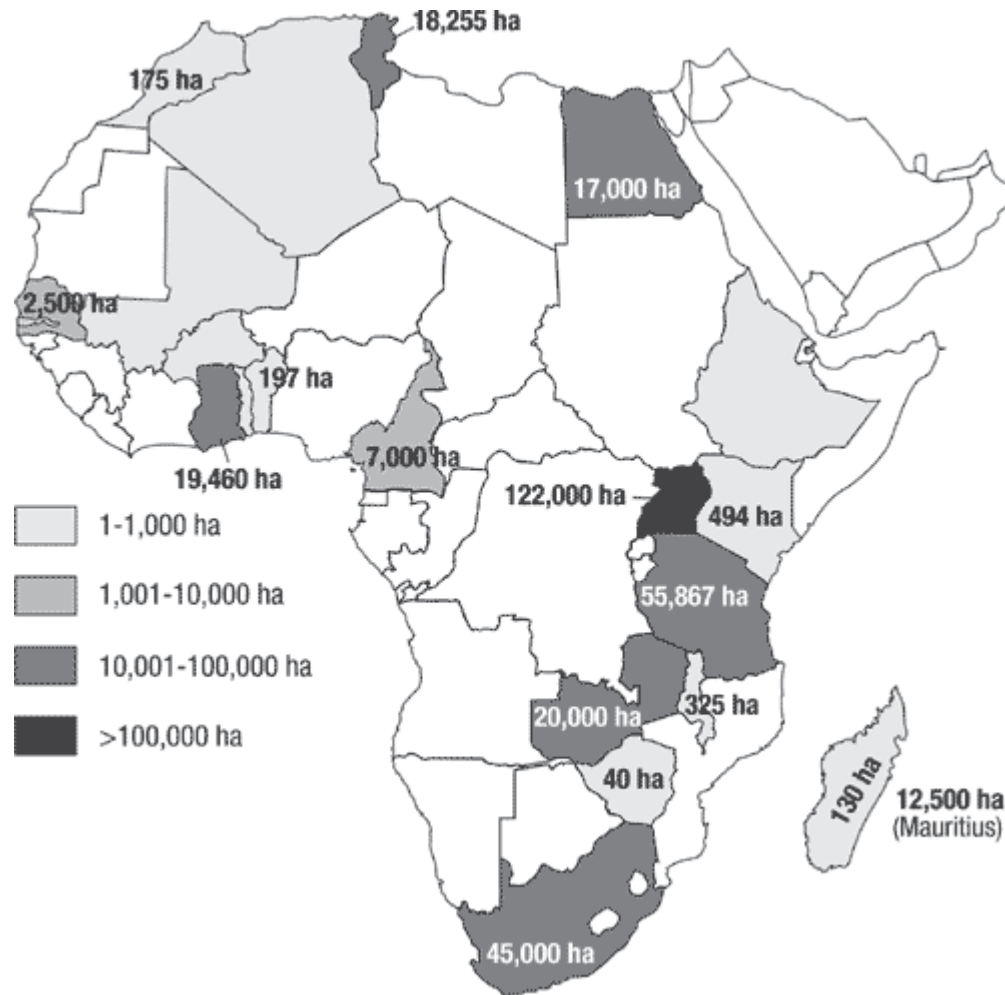

# Africa: The Facts

---

- Report by **Nicholas Parrot** and **Fred Kalibwani** (IFOAM Africa Coordinator)
- 320.000 hectares, 71.000 farms
- Organic farming is increasing, especially in the Southern countries
- Important growth factor: Demand for organic products in industrialised countries
- The African market for organic products is small (exceptions: Egypt, South Africa). Reasons: low income levels, underdeveloped infrastructure for inspection and certification
- Tunisia is the only country with an organic regulation; Egypt and South Africa are making progress

# Africa: Map of Organic Agriculture

# Asia: The Facts

---

- Report by **Ong Kung Wai** of Grolink
- 880.000 hectares, 61.000 farms
- Main producing countries: China, Ukraine, India, Indonesia, Isreal
- Biggest market: Japan; emergent markets: China, Malaysia, Philippines, Singapore, Thailand
- Most certification carried out by foreign bodies; own certification bodies in China, Japan, Israel
- China, India, Philippines, Thailand, Malaysia work on organic legislation

# Australia / Oceania: The Facts

---

- Report Australia: **Darren Halpin and Martin Brückner** (Cowan University)  
Report New Zealand: **Seager Mason** (BioGro)
- 10 million hectares; 2000 organic farms
- Growth factor: Overseas demand (Europe); domestic market is small
- Government support because of the export potential
- Australia and New Zealand have both national regulations and are both on the third country list of the EU

# Australia / Oceania: Map of Organic Agriculture

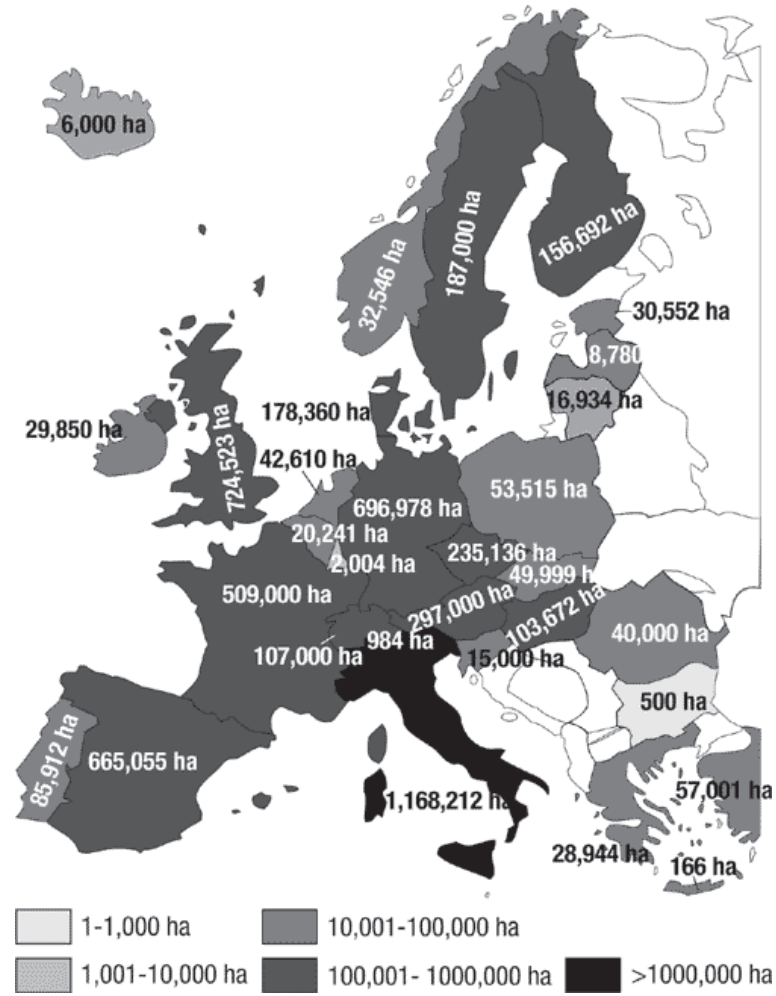

# Europe: The Facts

---

- Report by **Toralf Richter and Helga Willer**, both FiBL
- European Union: 4.8 million hectares (=3.5 % of area), 140,000 farms
- Europe: 5.7 million hectares, 174,257 farms
- Rapid expansion of the market, market shares up to 4 % (Switzerland)
- Strong government support in most countries through area based payments, research support and through action plans
- The European Action plan should be finalised in the course of 2004

# Europe: Map of Organic Agriculture

© SOEL

# Latin America: The Facts

---

- Report by **Pipo Lernoud**, IFOAM Board of Directors
- 5.8 million hectares, 143,000 organic farms
- High shares of organic land in Costa Rica, Uruguay, Chile, Argentina, Bolivia
- Most of the organic production is exported
- Government support is generally small with the exception of Costa Rica (support for research and teaching), Argentina and Chile (support for exports)
- Support from international agencies for extension and association building

# Latin America: Map of Organic Agriculture

© SOEL

# North America: The Facts

---

- Report by **Barbara Haumann** of the Organic Trade Association OTA
- 1.5 million hectares, (=0.3 % of agricultural land), 10,500 farms
- Launch of the National Organic Programme (NOP) has triggered market growth in the USA
- Canada has a voluntary standard
- The US market is growing fast and is now bigger than the European market

## EISFOM-Seminar April 2004

- EISfOM = European Information System for Organic Markets
- Main objective: to develop a framework for collection and processing of reliable and comprehensive data on organic production.
- **Seminar: Development of European Information Systems for Organic Markets - improving the availability, quality and comparability of statistical data**
- Berlin, Germany, **26th/27th April 2004**
- **Contributions sought**
  - on current problems and opportunities for development in organic data collection and processing or
  - on issues in international data harmonisation and quality assurance in organic data collection and processing systems
- Info [www.eisfom.org](http://www.eisfom.org)
