

# ORGANIC TRENDS

## NEWSLETTER FOR ORGANIC FARMING AND FOOD DEVELOPMENT IN CHINA

Upcoming events ~ Reporting activities ~ Introducing projects ~ Consumer guide ~ Useful websites & publications ~ Jobs ~ International organic food trends ~ Who is who? ~ Contact details

*ORGANIC TRENDS* aims to promote environmentally friendly and healthy food production and processing. Offering a forum for producers, distributors, retailers, consumers as well as academicians, it reports on recent trends in organic farming and food development and provides consumer information. Contributions are welcome!

**Editor:** China Environment and Sustainable Development Reference and Research Centre (CESDRRC)

## I. News from China and International Trends

- ◆ From Nov. 22 to 24, the **Organic China Expo and Conference** was held at the China World International Exhibition Centre and Jing Lun Hotel in Beijing. Eva Sternfeld gave a presentation on 'Consumer Awareness and Organic Consumption' at the forum.
- ◆ **Organic Food Conference of National Environmental Authorities Held in Nanjing**  
On Dec. 8, 2007, the Organic Food Development Centre (OFDC) of SEPA organised the first 'National Environmental Authorities Organic Food Development Conference'. Delegates from SEPA, the Environmental Research Institute in Nanjing (SEPA), the Environmental Monitoring Centre of South East China as well as from Shandong, Yunnan, Inner Mongolia, Shanxi, Guizhou, Jiangsu and Qinghai attended the conference. Among other topics the delegates discussed the new 'National Regulation for Inspection of Organic Food Production Sites (trial version)'. OFRC newsletter 2007/5
- ◆ **First Organic Products Certification Technical Conference held in Nanjing**  
On Dec. 12 and 13, in order improve the efficiency and quality of organic product certification, the first 'Organic Products' Certification Technical Conference' was organised in Nanjing by the China National Certification Administration (CNCA) and OFDC. Representatives of 27 organic food certification bodies attended the conference, during which representatives of OFDC and OFCC introduced certification of imported organic products, organic certification labelling, the conversion phase for organic certification, inspection and other related technical questions. The representatives of the certification bodies signed the 'China Organic Food Certification Bodies Declaration'. OFRC Newsletter 2007/5
- ◆ **Organic Farming on the Rise in China**  
China's small but nascent organic market is enjoying high rates of growth. Official figures show that in 2006, domestic sales of organic produce were up 50%, and exports increased from US\$150m to US\$350m during 2004-5. With around 5.7 million hectares of certified organic farmland, the country is the third largest organic food producer in the world, behind Australia and Argentina.  
While the majority of Chinese people are unable to afford organic produce, the domestic market is being driven by growing demand in wealthier urban areas, particularly in the wake of recent food scares. Trade with export partners such as Japan and Taiwan is also increasing. Dr Eva Sternfeld of the China Environment and Sustainable Development Research Centre (CESDRRC) believes that although the country's organic market is around 20 years behind many developed countries, it could catch up within the next five to 10 years. [www.new-agri.co.uk/07/06/brief.php#299](http://www.new-agri.co.uk/07/06/brief.php#299)
- ◆ **Organic Farming Grips China**  
By Juliana Liu, BBC News, October 4, 2007  
Yanqing, China  
Cows at Green Yard, one of China's first organic dairies, enjoy a pampered life in the country. They take daily strolls in the pasture. For a morning snack, the cows graze on grass untouched by pesticides. When it's time for a more filling meal, they dine on organic hay from Inner Mongolia, or perhaps sweet corn, grown right on the farm. When they get sick, they take only traditional Chinese medicine.  
The man behind Green Yard is Wang Zhanli, a farmer born in Yanqing, about two hours' drive from Beijing. He persuaded 50 of his neighbors to invest in his business. Mr. Wang had initially started a traditional dairy, but his small farm was no match for mass-market

brands such as Mengniu Dairy, based in Inner Mongolia. About three years ago, he decided to make the switch to producing organic dairy products, because he could charge more. "Nowadays, what we eat is important," he said. "It's important to eat food that is good for you. A lot of farmers in China use too many pesticides. I got into this business because I thought the dairy market would take off. It's hard to succeed in the mass market, but we're selling a better product."

Green Yard's product costs two to three times more than regular milk. With only 600 cows, the dairy supplies a small market in Beijing, but the company is keen to grow. It may be at least another year before the dairy covers its initial investment. Small volume and high growth sums up China's nascent, and still tiny, organic market. Most of the country's organic products are sold overseas to Japan, Taiwan and other Asian countries. Official figures show organic exports totaled \$350m in 2005, up from \$150m from 2004. China has about 5.7 million acres of certified organic farmland, behind only Australia and Argentina worldwide.

Green Yard's Mr. Wang says much more needs to be done to raise awareness of organic food in China. Many people are unsure about the differences between organic and so-called 'green food', which has been promoted as an alternative to organic. In a country where fakes abound, many consumers are wary of paying top dollar for food that may not actually be organic. Still, domestic sales grew about 50% last year, though the vast majority of Chinese simply can't afford to buy organic.

Dr Eva Sternfeld of the CESDRRC says frequent media reports about tainted food are driving the market. "From my German experience, I would say China is maybe 20 years behind," she said. "But our experience shows us also that China is developing very fast, so it might only take five or 10 years before China catches up."

#### ◆ **Unauthorized U.S. Genetically Engineered (GE) Rice Found in Beijing**

Greenpeace warned that for the first time, unauthorized GE rice from the U.S. has been found on supermarket shelves in Beijing. The environmental group urges the U.S. government to strengthen export control of food products containing GE ingredients, and cautions Chinese consumers against imported rice from the U.S. Greenpeace collected ten U.S. food samples from two supermarkets in Beijing in August and September, and they were sent for testing by Eurofins, a Germany-based independent laboratory. The test results showed that one of the samples, Mahatma Extra Long Grain Enriched Rice, contained a herbicide resistant GE rice called LL601. The Chinese authority has not approved LL601 or any other GE rice for import or market sale.

GE rice LL601, a product of Bayer, was approved for commercial growing in the U.S in 2006, after it was found to contaminate U.S. rice products. Currently, the U.S. is the only country that allows commercial growing and sale of GE rice. GE rice LL601 has contaminated U.S. food exports to at least 32 countries, including China, where GE rice LL601 has not been approved for import. It is estimated that the contamination incidents caused by LL601 rice have cost the farmers and industry US\$741 million to US\$1.285 billion. Rice is the most important staple crop in the world. It is consumed daily by approximately 2.5 billion people. Chinese research institutes have been applying for commercialization of GE rice in China since 2004, and an incident of contamination with illegal GE rice also occurred, but so far the Chinese authority has not given the green light to any GE rice.

Nov.20, 2007 Greenpeace [www.greenpeace.org/china/en/press/release/ge-rice-from-us](http://www.greenpeace.org/china/en/press/release/ge-rice-from-us)

- ◆ **Global Organic Cotton Market Tops One Billion Dollars in 2006**  
 The global organic cotton apparel, home and personal care products market topped one billion dollars in 2006. Estimates are projecting a tripling of that amount by the end of 2008, and a further doubling by 2010, according to the results of a report from Berkeley, California-based Organic Exchange (OE). Highlights from the report were released at the organization's 5th annual conference attended by over 330 professionals from 39 countries representing the entire global organic fibre supply chain. The five companies using the most organic cotton in 2006 were Wal-Mart (USA), Nike (USA), Coop Switzerland, Patagonia (USA) and Otto (Germany). Woolworth's South Africa and C&A (Belgium) have recently introduced large programmes.  
[www.organicexchange.org](http://www.organicexchange.org), Biofach Newsletter Nov. 16, 2007
  
- ◆ **Official: Organic is Really Better**  
 The evidence from the £12m four-year project will end years of debate and is likely to overturn government advice that eating organic food is no more than a lifestyle choice, reports The Sunday Times. The study found that organic fruit and vegetables contained as much as 40% more antioxidants, which scientists believe can cut the risk of cancer and heart disease, Britain's biggest killers. They also had higher levels of beneficial minerals such as iron and zinc. Professor Carlo Leifert, the co-ordinator of the European Union-funded project, said the differences were so marked that organic produce would help to increase the nutrient intake of people not eating the recommended five portions a day of fruit and vegetables. Researchers grew fruit and vegetables and reared cattle on adjacent organic and nonorganic sites on a 725-acre farm attached to Newcastle University, and at other sites in Europe. They found that levels of antioxidants in milk from organic herds were up to 90% higher than in milk from conventional herds.

 Biofach Newsletter Nov. 16, 2007
  
- ◆ **Wal-Mart Updates Sustainable Strategy**  
 U.S. retail giant Wal-Mart expects to sell 20% more organic cotton this year than it did in 2006. Estimated sales of 'alternative fibers', such as bamboo, soybean and recycled fibers will be 15% above last year's as Wal-Mart continues to purchase more eco-textiles, reports Ecotextile news. The use of more sustainable raw materials in textiles and clothing is part of a larger strategy by the world's biggest retailer to reduce its overall impact on the environment, which Wal-Mart outlined today in a new report that also defines the challenges, as well as goals, for moving forward. Wal-Mart is currently the largest single buyer of organic cotton in the world and also the world's largest purchaser of conversion cotton. In 2007, the company partnered with a large cotton spinner to commit to the purchase of more than 10 million pounds of conversion cotton.  
[www.ecotextile.com](http://www.ecotextile.com), Biofach Newsletter Nov. 30, 2007
  
- ◆ **New Mandatory Labelling for all Types of Fruit and Vegetables**  
 From Jan. 1, 2008, the country of origin must be stated for all kinds of fruit and vegetables in the EU. This mandatory labelling previously applied only to fruit and vegetables subject to EC marketing standards. A change in European law (article 2, paragraph 1 of Council Regulation (EC) no. 1182/2007) means that all types of fruit and vegetables now have to be labelled with their country of origin.
  
- ◆ **IFOAM Conference Demands Zero Tolerance of GMO**  
 The two-day conference of the IFOAM EU Group in Brussels, which attracted a record 270 participants, ended on Dec. 5, 2007. The aim of the highly successful conference was to

discuss the future strategy for implementing organic agriculture in Europe. Various departments of the EU Commission were also invited, and many officials from the EU administration were clearly impressed by the event, welcoming further proposals and collaboration with IFOAM.

◆ **New Fair Trade Standard from IMO Control**

Consumers have been shocked by recent media reports about child labour in the textile industry, and politicians and the procurement industry are left wondering what actions to take. The aim of a new initiative is to help to improve the social and fair working and production conditions for textiles and other products worldwide. In a press statement, the Institute for Marketecology (IMO), one of the best known certification organizations in the organic industry, has announced a new programme that for the first time provides a standard certification and control system for products from fair and socially responsible production.

[www.fairforlife.net](http://www.fairforlife.net) Biofach Newsletter Nov. 30, 2007

◆ **Organic Milk Cuts Eczema in Children**

A newly published scientific study shows that the incidence of eczema in infants fed on organic dairy products, and whose mothers also consumed organic dairy products, is 36% lower than in children who consume conventional dairy products. Whilst there is a significant body of evidence showing that organic food contains higher levels of beneficial nutrients than non-organic foods, this is the first example of a definite health impact (i.e. isolated from other potential beneficial factors) of organic food consumption being published in a peer reviewed journal, says the British Soil Association.

[www.soilassociation.org](http://www.soilassociation.org) Biofach Newsletter Nov. 30, 2007

◆ **USA: Organic Industry Grew by 21% in 2006**

Organic foods are one of the fast-growing market segments within the food industry, with sales growing at an annual rate of 20.9 % in 2006. Meanwhile, U.S. sales of non-food organic products grew from \$744 million in 2005 to \$938 million in 2006, reflecting a 26% growth rate. Non-food categories include organic supplements, personal care products, household products and cleaners, pet food, flowers, and fiber products such as linens and clothing. Demand for meat, currently the smallest category, increased by 55 % last year. Dairy, the largest segment, had an increase in sales of 25 %. Fruit and vegetables showed the smallest growth rate between 2005 and 2006 (11 %).

◆ **Access to EC Marketing Norms on the Internet**

The marketing norms for fresh fruit, vegetables, potatoes, dried fruit, cut flowers, foliage and bulbs are now available on the newly designed web pages of the Federal Agency for Agriculture and Food (BLE). The marketing norms are issued by the EU Commission and apply directly to all member states at all levels of trade. In the case of imports and exports, a conformity control applies only to products for which there are marketing norms. All the information is also available in English and some in French.

## II. Introducing Certification Companies

- ◆ **CERES (Certification of Environmental Standards GmbH) Opens Shanghai Office**  
CERES an internationally operating certification company recently opened a China Representative Office in Shanghai. CERES carries out organic inspections and certification according to different governmental standards, such as regulation EEC 2092/91, USDA-NOP Final Rule, Japanese Agricultural Standard for the production of organic Foodstuff (JAS), Conseil des appellations agroalimentaires du Quebec (CAAQ). They further provide organic inspection services to several national and international private standards of farmers' associations or certification bodies (such as Demeter, Naturland, BIO Suisse, QAI, etc.). With the Soil Association Certification CERES signed a 'Contract for Symbol Programme Product Acceptance'.

## III. Projects promoted by NGOs in China

The following introduction is an excerpt from the China Environmental Health Research Brief "Going Organic: Certification and Projects Promoting Safer Agriculture and Organic in China" by Natalie Baer. For the full report please check

[www.wilsoncenter.org/index.cfm?topic\\_id=1421&fuseaction=topics.item&news\\_id=350674](http://www.wilsoncenter.org/index.cfm?topic_id=1421&fuseaction=topics.item&news_id=350674)

- ◆ ***Pesticide Eco-Alternatives Centre (PEAC)***: Founded in 2002, PEAC, based in Yunnan Province, is China's first - and still only - environmental NGO focusing exclusively on pesticide problems. The mission of PEAC is to protect human and ecological health from farm chemicals by lowering the use of harmful pesticides and promoting alternative forms of pest control. PEAC carries out research and outreach projects that use consumer and farmer participatory approaches. [www.panchina.org](http://www.panchina.org)
- ◆ ***The Global Environment Institute (GEI)***: As part of its Sustainable Rural Development Programme, this Beijing-based NGO has been carrying out a Biogas and Organic Agriculture Project in China's southwest since 2004. Many small farms in China struggle to compete with the increasingly corporate and government-dominated agricultural market,

which is why in Yunnan, Guangxi, and Tibet, GEI has helped to form organic farmer cooperatives that aid small farmers to enter into the organic niche market. In Lijiang (western Yunnan), GEI recently set up groundwork for the sale of local organic produce to fund its local development programme.

[www.geichina.org/index.php?controller=Default&action=Index](http://www.geichina.org/index.php?controller=Default&action=Index)

- ◆ **Greenpeace China:** One of Greenpeace China's core campaign areas is sustainable agriculture, which includes promoting awareness on the dangers of excessive pesticide use and genetically modified food products, and carrying out activities to encourage organic food. For example, Greenpeace has helped co-organize some organic farmers' markets in Hong Kong with the Hong Kong Organic Farming Association and the Kadoorie Farm & Botanic Garden. In 2007, Greenpeace China launched new sustainable agriculture programme in Guangdong and Yunnan that included a strong organic component.  
[www.greenpeace.org/china/en/campaigns/food-and-agriculture/pesticides](http://www.greenpeace.org/china/en/campaigns/food-and-agriculture/pesticides)
- ◆ **Kadoorie Farm and Botanic Garden:** This Hong Kong-based NGO was established in the 1950s to bring agricultural aid to poor farmers. Today, KFBG plays an active role in promoting conservation, biodiversity, and sustainable agriculture in Hong Kong and southern China. Since 1999, KFBG has cooperated with seven other local organic farms to form the Hong Kong Organic Farming Association (HOFA), which coordinates networking between organic producers and supporters within the region. HOFA is also working to promote and develop the market for organic produce through the establishment of a local standard and certification programme that will encourage education, information exchange, and marketing of reliable and sustainable organic produce. HOFA also researches organic farming methods and offers technical support to farmers making the conversion to organic.  
[www.kfbg.org.hk](http://www.kfbg.org.hk)
- ◆ **Rockefeller Brothers Fund:** This foundation has supported organic certification and research in southern China for a number of years. A 2007 grant to Greenpeace China is supporting a project to carry out a campaign promoting sustainable agriculture in China by building consumer interest in food safety in Guangdong and Yunnan provinces and to highlight successful organic agriculture in these two provinces.  
[www.rbf.org/programs/programs\\_show.htm?cat\\_id=1654&doc\\_id=502525](http://www.rbf.org/programs/programs_show.htm?cat_id=1654&doc_id=502525)

#### IV. Publications

- ◆ **2008 CESDRRC Organic Food Directory**  
The CESDRRC has compiled a directory of organic supermarkets, restaurants and farms throughout China, and has recently added many new addresses. To order your free electronic copy, send a message to [aiwastar@163bj.com](mailto:aiwastar@163bj.com).  
The Food Directory will soon also be available for download from the CESDRRC website at: [www.chinaeol.net/cesdrcc](http://www.chinaeol.net/cesdrcc), as well as the website of the German Chamber of Commerce in Shanghai: <http://china.ahk.de/en/news/single-view/article/409/46/>
- ◆ **Organic Food Consumer Guide for Beijing, Updated 2008 Version**  
An updated electronic version of CESDRRC's Organic Food Consumer Guide for Beijing (English/Chinese) is now available. To obtain the PDF file, send a message to [aiwastar@163bj.com](mailto:aiwastar@163bj.com)

#### IV. Upcoming Events and Trade Fairs

- ◆ **BioFach 2008 World Organic Trade Fair**  
Feb. 21-24, 2008, Nuremberg, Germany  
Web: [www.nurembergglobalfairs.com](http://www.nurembergglobalfairs.com), [www.biofach.de](http://www.biofach.de)
- ◆ **Conference 'Organic Agriculture and Climate Change'**  
April 17-18, 2008, Clermont-Ferrand, France  
Venue: ENITA  
This international conference, subtitled ‘The contribution that organic agriculture and our dietary choices can make to the mitigation of global warming’, will be the first scientific European meeting devoted to the impact of agricultural techniques and food habits on climate change.  
Contact: Conference Secretariat, Annabel Barthélemy, ENITA Clermont, Marmilhat, BP 35, F-63370 Lempdes, tel.: +33.(0)473.981329 or 981355, email: [colloquebio08@enitac.fr](mailto:colloquebio08@enitac.fr)  
Web: [www.isofar.org/events/documents/2008-04-17-climate-conference-clermont.pdf](http://www.isofar.org/events/documents/2008-04-17-climate-conference-clermont.pdf)
- ◆ **"Planet Diversity." A World Congress on the Future of Food and Farming**  
Bonn, Germany, 12-16 May, 2008  
For five days, during the negotiations of the UN-Convention on Biodiversity, we will discuss how farmers, consumers, food producers and their communities can cooperate to enrich and defend this diversity. A global movement from different directions is coming together for the common cause of defending diversity against destructive and threatening tendencies in agriculture, rural development and food production. "Planet Diversity" will bring together representatives from local and regional grassroots movements and

institutions working on food and agricultural tradition, innovation and reconciliation based upon cultural and biological diversity.

[www.planet-diversity.org](http://www.planet-diversity.org)

◆ **BioFach China International Organic Trade Fair and Conference**

May 29-31, 2008, Shanghai

Venue: Everbright Convention Centre & Exhibition Centre

Web: [www.biofachchina.com](http://www.biofachchina.com)

◆ **16<sup>th</sup> IFOAM Organic World Congress**

June 18-20, 2008, Modena, Italy

Regional values and indigenous knowledge is where we derive experiences and inspiration!

Innovation – in all fields – is how we best launch into the future.

Cooperation between different parties, such as producers & consumers, government & private sectors, scientists & practitioners, south & north, communities, regions & countries.

The IFOAM General Assembly will be held in Modena from June 22-24, 2008.

Contact: Consorzio Modenabio 2008, Via Rainusso, 144, 41100 Modena, Italy, email: [ifoam2008@provincia.modena.it](mailto:ifoam2008@provincia.modena.it), web: [www.ifoam.org](http://www.ifoam.org)

## VI. Address Updates

In this section, as a special service to our readers, we share lists of supermarkets, restaurants and farms that sell/ serve organically grown food in Northern China. This list is probably far from complete, so please let us know if you know of additional addresses and/or have found mistakes. In our past issues we already introduced lists of supermarkets, farms and restaurants in Beijing, Shanghai and Southern China, now all comprised in the ‘**2008 CESDRRC Organic Food Directory**’. If you wish to receive it, please contact us!

### Updates for the Beijing Area:

- ◆ **Joyful Organic** is a new online ordering company in town. Owners are Taiwanese and Canadian-Chinese [www.joyfulorganic.com](http://www.joyfulorganic.com) (Chinese only)
- ◆ **New Lohao City Store Opened in Beijing.** Lohao’s fourth Beijing outlet is located in the CBD district. Address: WTC –Central Store, 101, Block 17, phase 2 B Chaowai Dajie, Central Park, Chaoyang District. Tel. 65336465 – 808 北京市朝阳区朝外大街 6号新城国际二期 17号楼 101
- ◆ **Healthy Supermarket** specialized in organic and Greenfood products from Heilongjiang, Beijing, Chaoyang Wangjing Area, Nanhulu 15 哈尔信 食品超市望京南湖店, 北京市朝阳区南湖路 15号 (金隅丽港城底商) Tel. 84771644, <http://www.ejshw.com/>
- ◆ **BHG Market Plaza**, imported and organic food from China including certified organic fresh meat Shin Kong Place B1, Jianguo Road 87, Chaoyang District, BHG 食品超市, 新光天地 B 1 朝阳区建国路 87, Tel. 65307062
- ◆ **ECOHome Store ECOH 生态家** Öko-TEX Standard 100 certified cotton and bamboo textile products, bamboo charcoal based natural cosmetics. imported and domestically produced Shin Kong Place B1, Chaoyang District, Jianguo Road 87, 新光天地 B 1 朝阳区建国路 87 [www.ecohome.com.cn](http://www.ecohome.com.cn)
