Weed modeling: Why?

- Proximate
 - fun
 - profitable
- Ultimate
 - science (research, education)
 - technology (tactics, strategy, policy)

Models are thinking tools

Models help us formulate notions about the dynamics of the different species that an ecosystem comprises.

AP Gutierrez 1996

Modeling for weed science

- Research
 - integration
 - analysis
 - idea generation
- Education
 - theory
 - practice

Models make you think

The purpose of models is not to fit data
but to sharpen the questions.

S Karlin

A diversity of models

- 134 scientific papers
- 60 weed species
- 40 crops

Holst et al. (2007). Weed Research 47: 1-14.

Modeling life cycle

1. Formulate
2. Implement
3. Test
4. Publish
