

IFSA Workshop 5.4

Exploring farmers' conditions, strategies and performances in a context of multi-dimensional policy requirements, market imperfections and globalisation

Wednesday 13 July

Each session is 90 minutes and has 4 presentations, which means that each paper can be allocated 22 minutes. Please prepare a powerpoint presentation for 15 minutes, such that each presentation can be followed by a 7-minute discussion.

Session 1: 11.00 h – 12.30 h

- Grando et al., Sustainable strategies for sustainable farming
- Weltin et al., The role of financial support: Strategies of farm households on diversification of income sources under two policy scenarios
- v. Münchhausen et al., Adaptation strategies and performances of three producer groups during times of change: lessons learned from the application of the Conditions-Strategies-Performances (CSP) concept in three case studies
- Methorst et al., Three-fold embeddedness of farm development

Session 2: 13.30 h -15.00 h

- Prosperi et al., Towards Sustainable Strategies for Fisheries and Aquaculture
- Kirwan et al., Making the connections between medium and small-scale dairy farmers and inshore fishers: a resilience perspective
- Thorsoe et al., Risky business – a genealogy of the financial discourse in Danish agriculture
- Larcher et al., Applied and planned risk management strategies of Austrian farmers

Session 3: 15.00 h -16.30 h

- Madelrieux et al., Effects on territories of ending milk quotas. Exploratory findings from two contrasting French case studies: the Niort Plain and the Chartreuse Massif
- Lumbroso et al., Revealing strategic conversations around future visions of agriculture to improve the debate on transformation pathways towards sustainable farming systems
- Minarelli et al., Asymmetric information along the food chain supply chain: a literature review
- Bonjean et al., Interrelationships between market imperfections and policy requirements in agriculture and fisheries
