Global organic food and beverages market in 2019 was around USD 220.00 Billion. The market is expected to grow at a CAGR of more than 16.0% and is anticipated to reach around USD 620.00 Billion by 2026.

In today’s world where everything is driven by the new state-of-the-art technologies, farmers are reverting back to age-old farming activities on this planet for the greater good of humanity. A new generation of health-conscious customers, increasingly mindful of the adverse effects of pesticides and other contaminants in food, has necessitated this, farmers are now reverting to age-old agricultural methods to grow which is known as organic food. This agricultural norm is governed by the government department of different countries, which also includes guidelines for governing food which animal care cultivation. The use of chemical fertilizers, pesticides, synthetic chemicals, and growth hormones in the processing of organic foods and beverages is not permitted or only partially permitted. In addition, organic foods and beverages provide significant advantages over regular diets, such as nutritional benefits, free of toxic additives, and more.

The rising consumer awareness regarding the health benefits of organic food and beverages and its widespread use in the food & beverage industry is one of the most key factors driving the growth of the global organic food and beverages market. The global organic food and beverages market is expected to grow owing to the in-demand by the rising demand wellness industry. People's diet has contributed to numerous illnesses across the world, like obesity, blood pressure, and diabetics, which have raised the rate of organic food consumption. The rise in a number of supermarkets, department shops, and grocery stores has also catalyzed the development of the global organic food and beverage industry as they showcase the items and some have reserved a separate segment for organic food at their outlets. It has elevated the demand for organic food and beverages and an extensive focus on research and development by key players. The growing number of the manufacturing sector is anticipated to witness significant growth in the global organic food and beverages market within the forecast period. High price and low shelf life the of organic food and beverages may hamper the market’s growth. Research and development, innovations activities in the technology of organic food and beverages, and increased investment in organic food and beverages products are anticipated to open new avenues for the organic food and beverages market in the near future.
