

Organic Eprints

- an international open access archive for organic research

Search for knowledge - share your knowledge

Organic Eprints is an international open access archive with immediate and permanent access to papers and projects related to research in organic farming and food systems. The archive facilitates communication about organic research, improves dissemination and impact of organic research findings and documents organic research efforts.

In the Organic Eprints archive you have open access to:

- scientific publications, books and book chapters, theses, reports, newspaper and magazine articles and various conference contributions
- information about organisations, projects and research facilities relevant for organic farming research, videos and practise tools

Organic eprints

Take your organic research to the next level!
