# Etablering af ny bærbusk baseret platform

## Mission

- At demonstrere et markdriftssystem med blandede landbrugs- og grøntsagsafgrøder med samdyrkning af permanente afgrøder (bærbuske).

## Formål

- At sikre et forsøgsdesign der understøtter sribedyrkningsprincipperne i GUDP projektet Stripcrop, som arbejder med biodiversitet i kontekst af mixed cropping/strip cropping og biodiversitet.

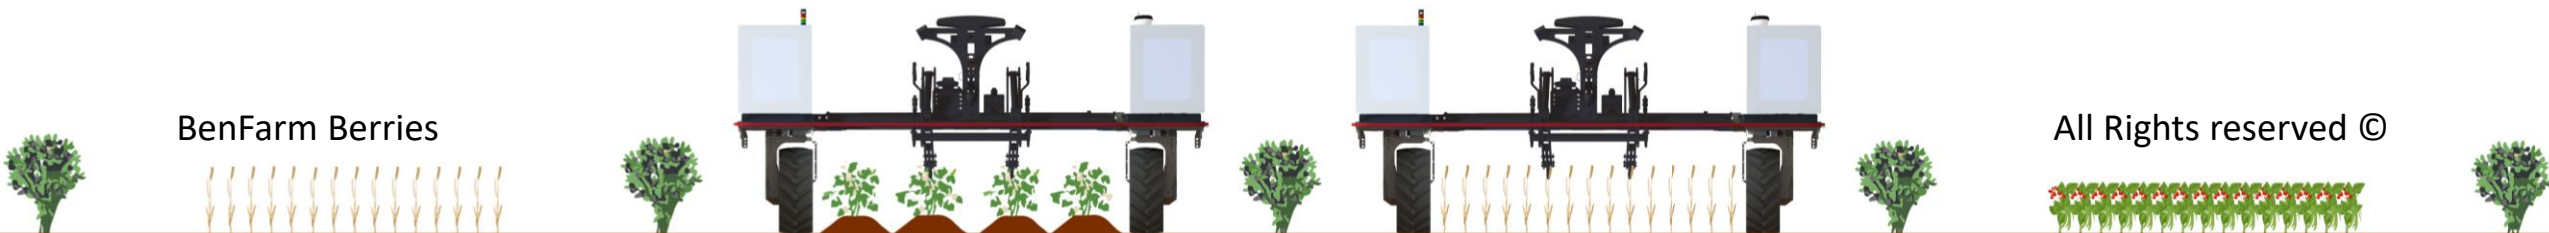

## Design

- 3 gentagelser med bærbuske på 13,5 meter og landbrugsafgrøder i mellem i striber af 3 og 6 meter
- 3 gentagelser med bærbuske på 7 meter og landbrugsafgrøder i mellem striberne på 3 meter

## Afgrøder

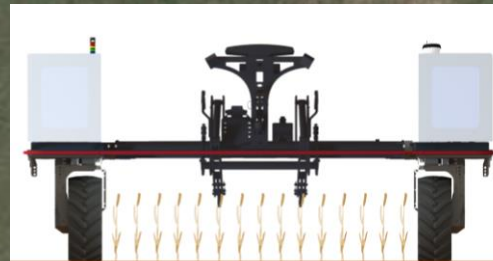

- Bærbuske: Solbær, Ribs, Stikkelsbær, Hindbær, Brombær
- Landbrugsafgrøder: Havre, Rug og Hestebønner
