#SESScentre senior researcher Yoko L. Dupont presented projects at the Norwegian seminar "How to assist the farmer with beneficial measures for pollinating insects?" with a focus on flower strips and how to best implement them in agricultural landscapes. The seminar marked the end of two Norwegian projects POLLILAND and POLLIEFFEKT

Yoko Dupont presented two Danish projects, Next Generation Flower Strips, and Organic+, where flower strips are incorporated with a holistic approach

The seminar was organised by The Norwegian Agricultural Counseling (Norsk Landbruksrådgiving Ås) and The Norwegian Institute for Nature Research (NINA - Norsk institutt for naturforskning) with support from Landbruksdirektoratet and The Research Council of Norway (Norges forskningsråd)
