**CATALOGUE OF UKRAINIAN
ORGANIC EXPORTERS**

BERRIES

LLC

AGROVEST GROUP LLC was founded in 2011. The main activity is certified organic crop and livestock production.

The company specializes in production of organic cereals and legumes. The main crops grown are spelt, oat, wheat, barley, buckwheat, soybeans, and corn.

Today, the farm grows crops on the area of 3,892 hectares, which are certified according to the EU organic requirements.

The company is export-oriented. Some of the organic crops are exported to the EU market, and the rest remain as feed for the cattle.

The company is a breeder of Simmental cattle. The number of cattle amounts to 1,760 heads, including 755 dairy cows. All the Simmental cattle and dairy cattle have been imported from Europe.

AHIMSA UKRAINE

LLC

In 2005 we gathered a group of people who like to live in a different way – with no harm, envy, greed, etc. We want to change our life for better and create a community of people who can show that we can be happier working together with nature and cows. And we did it! We got the best 150 hectares of land and soil in Ukraine – a nature reserve in one of the purest places – Chernenchyna village, Dnipropetrovsk region, on the bank of the purest river of Europe – the Orel River. Since that time we have been turning our ideas into reality and creating a small village: working hard, developing land and growing!

Now we have:

- 40 hectares of berry fields (strawberry, raspberry, red currant);
- 100 hectares of amaranth, spelt, wheat, rye, and corn;
- 5 qualified specialists, who are practicing the Ahimsa lifestyle and bring love and care to our plants;
- more than 40 people, who live together, work on fields with love and care, and who are fully happy about that;
- our Ahimsa™;
- thousands and thousands of grateful customers, who love our products.

AMETHYST-OLE

LLC

The company was created in 2011 by Vasyl Chamor. In 2013, the company was certified organic for the first time and has confirmed its organic status yearly ever since. In 2018, we passed HACCP, ISO 9001:2015 and ISO 22000:2005 audits. Amethyst-Ole has been acknowledged by Naturland since 2013. At this point, two powerful production lines for electronic berry sorting are in use at our facility. With cutting-edge equipment and professional teamwork, the company produces up to 30 tonnes of IQF produce a day.

As of today, we have 3 freezing chambers with a total capacity of 40 tonnes and 2 storage chambers where up to 700 tonnes of products can be stored at the same time. Our production capacity allows us to produce up to 30 tonnes of frozen produce daily. Food safety and product quality are the two most important factors in growing, collecting and processing our fresh berries, mushrooms and nuts. From the field and forest to harvesting and through production, Amethyst-Ole strives to assure food safety standards and effective tracking of both its organic and conventional products.

LLC

We are a family-owned company that was founded in 2005. We are located in the forest area in the west of Ukraine. For over 15 years we have purchased, processed, frozen and sold high-quality fruits supplied by our farmers from the ecologically cleanest regions of Ukraine.

Our mission is to make customers remember Darlissad when they think about berries. We seek to deliver high-quality products and to be a preferred supplier.

Our company upholds the highest quality standards in this competitive market. We are dedicated to continuously improving our quality, advancing production technologies, and consistently meeting our customers' requirements.

Taste the difference! We are open to the new projects!

ECO BERRY

LLC

The company was established in 2017. Our company specializes in growing such berries as organic garden strawberry, remontant raspberry, summer raspberry, black currant, red currant, blackberry, honeysuckle and blueberry. The company is also engaged in wild collection of bilberry, blackberry, cranberry, lingonberry, elderberry, and wild mushrooms in the Carpathian Mountains. Our farm is certified organic, so we can grow organic berries following the requirements of the EU organic and FSSC 22000 standards. All our products go through such processes as optical sorting, metal detection, and freezing of two types (static freezing, IQF in the OctoFrost tunnel). Packaging of finished products is possible at the customer's request or as offered by our specialists, for example, in 25 kg cardboard bags or 10 kg cardboard boxes.

The company already exports to the EU countries, namely, Poland, Italy, Bulgaria, Spain, Germany, Romania.

FAMILY GARDEN

LLC

FAMILY GARDEN LLC was established in 2016 by Ivan P. Grechkivsky and Volodymyr I. Pak, members of the same family. FAMILY GARDEN produces organic fruits and berries. The lands used to grow organic crops are located in Katyuzhanka village, Kyiv region.

At the very date of establishment of FAMILY GARDEN the founders realized that organic production of berries is what they were looking for. For that reason from the beginning they started to buy saplings, fertilizers and other special means to grow berries. In the past years the company exported berries to the EU, Malaysia, UAE. This year the company has the plans to expand its export market.

GOLDEN BERRY

FE

Our farm was founded on May 29, 2017 by Boris Kukunin and his family in Cherkasy region.

The farm "Golden Berry" specializes in growing berry crops, namely garden raspberries, garden strawberries, garden currants, blueberries and sea buckthorn, for further freezing and processing.

For cultivation, land plots were selected in principle, on which economic activity had not been conducted for decades and which were protected from various harmful influences, although great efforts and time were spent on bringing them into proper condition, the land plots were guaranteed to meet the requirements of safety and environmental friendliness.

Planting material from leading European nurseries and cultivation in compliance with the principles of organic farming with constant control introduced at all stages of production, guarantees the quality of the products, their safety and organicity, which is confirmed in the certification process of LLC "Organic Standard".

Today, the Golden Berry farm has about 45 hectares of berry fields, with the ability to produce: garden raspberries – 200 tons, garden strawberries – 100 tons, blueberries – 40 tons, garden currants – 20 tons, sea buckthorn – 20 tons.

LLC

Driven by the love for their native land, Oril-Eco company was founded in 2018. The company grows organic strawberries on an area of 12.8 hectares and organic remontant raspberries on an area of 22.7 hectares in the Tsarichansky district of the Dnepropetrovsk region, Ukraine. We have completely organic fields and organic crops.

Since 2019, the company has launched its own freezing complex, which now makes it possible to process the entire crop of strawberries and raspberries, as well as controlling every stage of the processing and packaging.

Every year Oril-Eco harvests and freezes 130-170 tons of organic strawberries and 100-130 tons of organic raspberries.

The production is certified according to the FSSC standard which is confirmed by corresponding certificate.

In 2022, despite the difficult situation in the country, our company starts a new berry project – the sublimation of raspberries and strawberries. The first freeze drier machine with 100 kg capacity of frozen raw materials starts working in July 2022. Two more such machines will be operational by the end of the year.

In addition, The Oril-Eco has been successfully exporting frozen berries since 2019 to the EU countries (Netherlands, Poland and Italy).

PRIMED

LLC

PRIMED LTD was founded in 1995. Our company is one of the largest producers and exporters of frozen berries and walnut kernels in Ukraine. In 2014, the company was certified organic, and in 2017 it was included in the list of the 3 largest companies producing organic products in Ukraine. Our own production facilities are located in the west of Ukraine, which makes it possible to produce only ecologically clean and 100% natural products. All the products are made from carefully selected raw materials, processed and packaged in accordance with international quality standards. One of the factors for company success is long-term and trustworthy relationships with committed business partners. The company pays special attention to improving communication, evaluation of customers' needs and their satisfaction with the highest quality and insists on continuous improvement. With commitment and experience in the industry, our mission is to provide premium healthy foods for our customers worldwide. We look forward to developing strong partnerships with customers who demand quality products.

PRODHOLOD-M

LLC

Company "Prodhodolod-M" was established in 2000 and is now one of the leaders in the Ukrainian market. The company specializes in collecting, processing, and freezing both wild and cultivated berries.

The primary focus of the company is on enhancing quality and increasing export volumes.

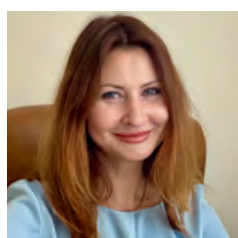

The head office and main production facilities are located in Novovolynsk. The site is equipped with modern freezing chambers that enable various levels of freezing and cold storage. Additionally, there are specialized departments for processing, sorting, and high-quality cleaning. Leveraging advanced equipment, the company ensures that all processing stages are carried out efficiently and in an environmentally friendly manner.

Our sorting and packing systems are designed to preserve essential nutrients and vitamins, which is critical for this type of production.

Strict quality control is implemented at every stage, from raw material procurement to the production of final goods. We continually strive to improve quality and diversify our product assortment.

Innovation and continuous improvement are the cornerstones of our company's policy.

LLC

Shans Vik LLC is a Ukrainian certified organic collector and processor of dried berries and herbs since 2018.

The drying facilities are located in Volyn region, in the ecologically clean area in the middle of forests far from big cities, there we have two natural air drying facilities with heat exchangers. All the raw materials are mainly wild collected and come for processing fresh on the day they are collected. The main processing line of herbs and berries is located in Lutsk, where we grind, divide into fractions, pack and inspect before shipping. 90% of our dried berries and herbs are exported to the EU for tea and pharmaceutical industries and comply with the European standards. The company policy is based on the principles of fair trade and long term relations with suppliers and customers.

LLC

TORIS LLC was founded in 1997. We are engaged in the harvesting, freezing and processing of blueberries, blackberries, elderberries, raspberries.

We also provide services for freezing, processing and packaging of berries to other intermediary companies.

One of the advantages of the company is its location in the forest zone of Ukraine. This allows us to have our own suppliers of fresh raw materials with daily delivery.

The company's own shock freezing installations allow us to quickly and efficiently freeze the delivered products.

The company has implemented the HACCP system and has ISO 22000 certificates "Food Safety Management Systems. Requirements for any organization in the food chain" and ORGANIC certificates that meet international quality standards.

TORIS LLC has many years of experience in cooperation with companies from the EU, such as Poland, the Czech Republic, and Lithuania, and has established itself as a reliable partner. We are currently actively working to expand the geography of cooperation.

It allows to control and receive eco-friendly and safe raw materials – wild berries from the stage of preparation and collection of berries in the forest. The company was established in 2016. Our activities focus on leadership in the segment of frozen fruit and berries, emphasizing the quality of incoming raw materials and processing technologies using the modern European equipment. Collection of raw materials is carried out in Ukraine in ecologically-clean Volyn, Lviv and Carpathian regions.

Our production facilities are located in the Carpathians and Lviv region. Today, there are 2 freezing facilities and 8 warehouses where 3,000 tonnes of frozen food can be stored at the same time. Recently we have had significant investments in the modern sorting and packaging equipment. Our production capacity allows us to produce more than 120 tonnes of frozen wild blueberry on a daily basis.

ZEMIYA ORGANIC

LLC

Founded in 2014, Zemlya Organic is a family-owned organic farm that exemplifies honest and environmentally responsible farming. Located just 20 km from Lviv, in a picturesque recreational area surrounded by forests, we deliver high-quality organic products thanks to the dedication of 6 full-time specialists and 50 seasonal workers.

We specialize in the cultivation of certified organic products that meet European standards.

Our main focus: Organic berry production, including raspberries, blackcurrants, and strawberries, as well as rhubarb and wild crops such as blueberries, sea buckthorn, and rose hips.

Processing Facilities

In 2019, we launched a modern factory for shock freezing and packaging, with a freezing capacity of 7.5 tons per day and a storage capacity of 1,000 tons.

In 2025, we plan to relocate and expand our freezing facilities to meet growing production demands.

AGROFIRMA POLE

LLC

Agrofirma «Pole» LLC: A Leader in Gluten-Free Hulled Millet Processing

Founded in 2007, Agrofirma «Pole» LLC specializes in producing high-quality **gluten-free hulled millet**, both organic and conventional, exclusively for international markets. As one of Ukraine's top exporters, the company supplies over 12,000 tonnes of organic millet and 8,000 tonnes of conventional millet annually, with 99% of its products destined for the European Union.

Sourced from 10,000 hectares of organic farmland, the millet is processed using advanced hulling and packaging technologies to ensure exceptional quality. In addition to hulled millet, the company offers gluten-free millet flour, baking mixes, millet extract, millet oil, and lentils, catering to the growing demand for sustainable and allergen-free products.

Key Achievements

- **Market Leadership:** By 2011, Agrofirma «Pole» LLC became Ukraine's leading producer of organic hulled millet, exporting 80% of its products to the EU.
- **Infrastructure Investments:** The company utilizes advanced storage and packaging systems, including vacuum and gas packaging, to maintain product freshness.
- **Sustainability:** Partnerships with certified farms ensure environmentally friendly production practices.

Agrofirma «Pole» LLC continues to lead the way in gluten-free food processing, delivering premium products to health-conscious and eco-aware consumers worldwide.

AGROVEST GROUP

LLC

AGROVEST GROUP LLC was founded in 2011. The main activity is certified organic crop and livestock production.

The company specializes in production of organic cereals and legumes. The main crops grown are spelt, oat, wheat, barley, buckwheat, soybeans, and corn.

Today, the farm grows crops on the area of 3,892 hectares, which are certified according to the EU organic requirements. The company is export-oriented. Some of the organic crops are exported to the EU market, i.e. Poland, Germany, Switzerland, and the rest remain as feed for the cattle.

The company is a breeder of Simmental cattle. The number of cattle amounts to 1,760 heads, including 755 dairy cows. All the Simmental cattle and dairy cattle have been imported from Europe. To achieve high results, the latest technologies for keeping Simmental cattle in organic livestock production have been introduced.

AHIMSA UKRAINE

LLC

In 2005 we gathered a group of people who like to live in a different way – with no harm, envy, greed, etc. We want to change our life for better and create a community of people who can show that we can be happier working together with nature and cows. And we did it! We got the best 150 hectares of land and soil in Ukraine – a nature reserve in one of the purest places – Chernechchyna village, Dnipropetrovsk region, on the bank of the purest river of Europe – the Orel River. Since that time we have been turning our ideas into reality and creating a small village: working hard, developing land and growing!

Now we have:

- 40 hectares of berry fields (strawberry, raspberry, red currant);
- 100 hectares of amaranth, spelt, wheat, rye, and corn;
- 5 qualified specialists, who are practicing the Ahimsa lifestyle and bring love and care to our plants;
- more than 40 people, who live together, work on fields with love and care, and who are fully happy about that;
- our Ahimsa™;
- thousands and thousands of grateful customers, who love our products.

ARNIKA ORGANIC (ARNIKA GROUP)

LLC

Arnika Agroindustrial Group is the largest producer and exporter of its own-grown organic commodities in Ukraine. Also, it is the second-largest organic company in Europe. We produce organic corn, soybeans, sunflower (high oleic), millet, lentils, mustard, flax and hemp. In addition, we implement R&D in breeding and ensure our own storing, handling and processing.

Arnika guarantees full transparency and traceability of the production chain as we use 24/7 GPS- monitoring and unmanned technologies during field operations. Besides, we have a powerful logistics department and can deliver our goods by trucks, rail wagons, sea containers and vessels. Therefore, we successfully export to customers from Europe, Asia, the Middle East and North America and are well known internationally.

We do not stand still and move towards the processing of the commodities we grow. We offer our clients high-oleic sunflower oil (crude and refined) as well as sunflower cake.

LLC

CHEMEX LTD has a history of more than 20 years in business. In 2020, the company launched its new organic processing plant in the Kyiv region.

CHEMEX LTD supplies premium quality organic ingredients under the brand name ProOrganica for the EU/ UK food and feed industry.

The company works with certified organic small to medium size Ukrainian farms, ensuring full traceability and transparency throughout the entire supply chain.

The processing plant dehulls, sorts, cleans and packs organic products in line with the EU organic and food safety requirements together with specified customer requirements.

All products are certified in accordance with the EU organic standards. The Food Safety Management System has been successfully implemented and certified according to FSSC 22000.

The company cooperates with independent accredited laboratories in Ukraine, the EU and the UK to confirm quality, safety and organic status of all the raw materials and products. Each year CHEMEX LTD exhibits under the brand name ProOrganica at the international fairs for organic products like Biofach (Germany), Natural&Organic Products Europe (UK), Middle East Organic&Natural Expo (UAE) and Sana (Italy).

GALEKS-AGRO

PE

Galeks-Agro PE was founded in 2008. The company's main activities include organic crop production and animal husbandry. The main crops are cereals (spelt, wheat, barley, millet, oats, buckwheat, corn), oilseeds (soya, mustard, sunflower, flax), vegetables (pumpkin, garlic, onions) and walnuts. The company produces a wide range of higher value-added products, including various types of flour and cereals, flakes, feed bran and soybean cake, on the area of over 10 000 ha. It is certified according to the Equivalent European Union Organic Production & Processing Standard and Bio Suisse.

The company specialises in breeding Simmental beef and dairy cattle. The number of cattle is more than 6,100 and is constantly growing. The company also breeds pigs, with a population of about 500.

Since 2014, Galeks-Agro has been producing organic honey (acacia, linden, buckwheat, and herbal), propolis, and pollen.

Our main export countries are Germany, Switzerland, Poland, the Netherlands, Denmark, Italy and the Czech Republic.

GLORIA INWEST

LLC

The farm, established in September 2018, operates in organic crop production and traditional dairy farming, with a focus on high-quality, environmentally friendly products. Covering a total area of 700 hectares, the company is committed to sustainable practices and rural development. After undergoing a transition period from 2020 to 2023, the company received its organic certification and invested in specialized equipment for mechanical cultivation and soil management. It grows a variety of organic products: soy, rapeseed, linen, amaranth, beans, millet and many other crops. While the company has traditionally focused on the Ukrainian market, it has expanded exports to Germany, Netherlands, Italy and is now seeking new international partners.

LLC

Grunweg LLC is a modern agricultural processing company specialising in the production of hulled millet. We use advanced technologies and equipment to produce a quality product while preserving the beneficial properties of the plant. Our aim is to create an efficient production, reducing the consumption of energy and raw materials per finished product. We use innovative technologies to achieve maximum efficiency and sustainable production.

At the beginning of 2021, a new company was registered and a building project was created. Building began in the summer of the same year and continued until 2023. After the official opening in December 2023, millet production started actively. The company already has an organic certificate, FSSC 22 000 and FDA registration. In the near future, the company plans to obtain SMETA certification. Production capacities are growing and we plan to reach the production volume of 15 thousand tonnes per year by the end of 2024 (we plan: organic 5 thousand tonnes and conventional 10 thousand tonnes).

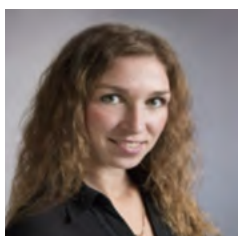

Now we are cooperating with Ukrainian companies and actively entering the international market, offering our partners a quality product and reliable cooperation. Together we will contribute to the development of the agro-processing industry and meet the challenges of modern agricultural production.

IZIUMSKE

LTD

The company was established in 1998 and started organic production in 2015. The company produces organic spelt and vegetables. Iziymske has not had export experience to the EU yet, but we would like to start to export this year. We have 90 hectares of organic land in Kharkiv region and we are in the new direction of our organic business. We mainly produce organic spelt and we really like this crop and know it is an important product for the international markets.

MAKYSHYNSKYI SAD

FE

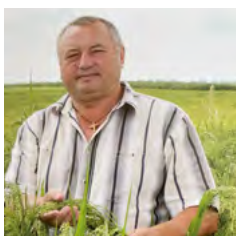

Makyshynskiy Sad Farm was established in 2007, and since 2012 it has been producing organic products. It grows such organic crops as spelt, lupines, oats and mustard. The farm leases land with an area of 1,600 hectares, which is only used to cultivate organic products. Each year, an average of 2,000 tonnes of legumes are exported to Germany, Poland, the Czech Republic, and the Netherlands. In the future, the farm plans to use new high-yielding varieties of crops, updated machinery and equipment. In addition, the farm plans to process crops into final products for human consumption, which requires special equipment and facilities.

FE

The company was founded in 2011 with the aim to distribute organic food in Ukraine. We can export both organic and conventional products, mostly wheat, rye, oats, barley, millet, amaranth seeds, flax seeds, rye flour, wheat flour, amaranth flour, etc. As a trader, we can source all the products from the local market, deliver them, check the quality and load in containers provided the quality is in conformity with the buyer's requirements. We ship in containers in bulk or big bags on CFR basis.

At the beginning of 2014, Organic Country TM was created and from that moment we have been distributing organic products certified by Organic Standard.

SKVYRSKYI GRAIN PROCESSING FACTORY

LTD

Skvyrskyi Grain Processing Factory Ltd was established in 1986-1991 on the basis of the grain reception centre operating since 1931.

Having passed a long path from a grain storage facility to a large-scale factory, today it is a modern, powerful and versatile enterprise, one of the leaders of cereal industry in Ukraine and one of the biggest plants in Eastern Europe.

The factory produces different types and grades of groats, flakes and flours from buckwheat, oats, corn, wheat/spelt, rye, barley, and millet. The products are represented in organic, conventional, gluten-free, and baby food quality.

The packing options include bulk, retail (TM Skvyrianka and TM Skvyra) and private-label packaging. Skvyrskyi Grain Processing Factory Ltd is a regular supplier for such worldwide brands as Danone, Nestle, Cerealto, Hero, Kellogg's.

Nowadays, the factory processes more than 5,000 tonnes of grain per month and more than 50% of the production volume is exported to the EU, Middle East, Asia, Africa, CIS, North and South America markets (80+ countries around the world).

The factory is certified according to FSSC 22000, Halal, Kosher, EU organic (UA-BIO-108), Bio Suisse, and Sedex standards.

STARYI PORYTSK

Старий Поритськ
porytsk organic

LLC

Sтары Porytsk LLC is a unique Ukrainian enterprise, founded in 2010, producing organic crops and dairy products.

In crop production the work is carried out in 3 directions: grain production, fodder production, production of pulse crops and fodder grasses.

Currently, the enterprise has 750 heads of cattle, including 300 heads of dairy cattle.

The average milk yield for 1 lactation cow is 5,500 kg of milk of "Extra" grade per year with a fat content of 3.8% per cow.

The strategy of the enterprise is to ensure a full cycle of production and sales of the products "from field to shelf". The use of traditional recipes and control at every stage of production ensures the highest quality and excellent taste of our products.

UKRBIOGROUP

LLC SOLONIANSKYI ZAVOD AHROPOLIMERDETAL, LLC ZAVOD
PLASTMASOVYKH VYROBIV SUPUTNYK, LLC NVP SAD, LLC KOLOS

UkrBioGroup – a family group of companies owned by the Kravchenko family. Group was founded in 2003. Since 2013, we have exclusively focused on organic farming. Our main goal is to support the progressive development of Ukrainian organic production. In addition, we uphold the values of responsible and careful management of land resources and biodiversity.

The group's land bank consists of about 5.5 thousand hectares exclusively organic lands located in the Dnipropetrovsk region, at the Center of Ukraine. Thanks to which, we are proudly among the TOP 5 largest organic operators.

The group of companies is certified by the international control body Control Union Certifications B.V. Our organic farming practices and production facilities comply with the most demanding organic programs in force in the European Union, Switzerland and the United States of America.

100% of the agricultural products that we offer are of organic origin and fully meet the requirements of food and feed safety.

100% of our land bank is certified, which allows us to effectively control production activities and minimize the risks of contamination of organic products with pesticides.

We own more than 100 units of machinery and equipment and 20 units of vehicles for field work and transportation of organic products. We work with a high-tech equipment for cleaning, sorting and calibration of organic products and packaging facilities.

We store our products in family-owned 12 warehouses certified for organic products, with a total capacity of over 30,000 tons. We have a practice of storing organic products in silo-bags.

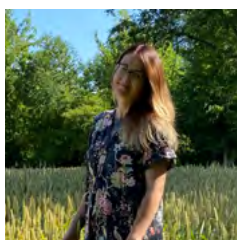

One of our main work principles is high quality products for our customers, produced exclusively on the basis of ecologically safe production.

ZHYVA NYVA

LLC

Our company Zhyva Nyva is one of the top ten producers of organic products in Ukraine, founded in 2009. We have been working for about 9 years and are constantly increasing the area under crops. We plan that in 2022 we will already have about 3,500 hectares of land. The crop rotation includes soybeans, sunflower, corn, millet, buckwheat, beans, spelt, and peas.

All the lands cultivated by Zhyva Nyva LLC are certified according to the international organic standards, i.e., EU organic, BioSuisse and COR. The products are grown far away from industrial centers using the technologies that have a positive impact on the environment.

The enterprise has a full cycle of grain production, including cultivation, cleaning, drying and storage, which allows us to provide the buyer with the best quality products. We use a long-term crop rotation and thoughtful innovative technologies that allow us to get high yields of the required quality.

AL-PRUT

LLC

The company Al-Prut LLC is located in the heart of the Carpathians and processes apples from ecologically clean orchards of Bukovina and Prykarpattia. The geographical location of the plant and the absence of industry allows us to obtain products of extremely high quality.

The company has been processing apples since 1991 and is constantly improving production to improve product quality. Since 2018, we have been producing organic juice.

We have the ability to produce 20-30 tons of organic juice per day, processing up to 200 tons of apples. The total capacity is 2,000 tons of organic concentrated apple juice.

The company employs up to 50 people.

The production line is equipped with BUCHER and AMOS presses, a BUCHER ultrafiltration unit and a German vacuum evaporation unit.

All activities of our company are aimed at constantly improving the quality and competitiveness of products, as well as meeting the needs and improving the health of consumers.

FE

The orchard of Farm Gadz with an area of 600 hectares planted in 2011 is located in a special microclimatic zone, which allows getting high quality fruits with excellent taste characteristics.

In 2021, 70 hectares of new orchard were planted, in compliance with modern Italian technologies, and more increase in the area, together with a nursery, is planned. It is planned to produce 1 million seedlings annually. The main varieties of apples are: Gala, Red Chief, Golden Delicious, Red John Prince, Idared, Fuji, Champion, as well as other intensive varieties; as well as Conference for pear, and Stanley for plum, which allows us to satisfy the most demanding customers.

In 2013, the farm put into operation a fruit storage, and in 2015 built a modern refrigeration and sorting complex with a total area of 5,250 m², which houses a sorting line Sorter, which allows us to sort the apples by caliber, color, and weight.

And in December 2016, a refrigeration complex with a regulated gas environment (CGS) with a capacity of 6,500 tonnes of storage was opened.

In 2020, the fourth phase of construction of a fruit storage facility with a regulated aerated medium with a capacity of 4,500 tonnes took place.

In 2021, the fruit processing plant was put into operation, with a capacity of 6 tonnes per hour. In July 2021, the Farm Gadz launched a line of aseptic bottling puree, and from August – a line of juices of direct extraction.

In 2017, the Ukrushka drying line was put into operation at the Gadz Farm. The use of red emitters and convection system allows us to dry different types of fruit with high productivity.

We are constantly increasing the geography of exports, today it is more than 20 countries in Europe, the Middle East, and Asia.

We sincerely believe that we "MAKE THE WORLD TASTIER!"

HEALTHY TRADITION

LLC

Healatte and Healthy Tradition are brands dedicated to producing wholesome drinks and foods, founded by a visionary woman with a goal to revolutionize the food processing industry. Our approach centers on quality, unprocessed ingredients, forming the foundation of our philosophy.

The core concept behind all our products is to promote digestion through a plant-based approach, eliminating added sugars, gluten, and preservatives. We prioritize the use of organic ingredients, upholding the highest standards of quality and purity. Our innovative plant-based products, introduced to the market, boast an extended shelf life of 12+ months without the need for preservatives, thanks to technology that preserves nutrients.

Maintaining close relationships with organic farmers and international suppliers, we comprehend all quality aspects from field to table. While our product range encompasses a variety of vegan, healthy foods – powder drinks, snacks, bars, dried breakfasts, and gluten-free bakery – not all are on the market right now. The outbreak of war resulted in a production pause for some products. In 2024, our primary focus will be on expanding exports, particularly our Healatte brand of powder drinks.

Healatte, our healing beverages, gained immense popularity during the pandemic, providing solace and immune support during challenging times. We started exporting our products in 2020 and continue to expand into new markets.

We take immense pride in the unique value our products offer to consumers.

KOLOSOK

SPE

MPP "Kolosok" is a recognized manufacturer of high-quality concentrated juices both in Ukraine and abroad. The production of concentrated apple juices is the main direction of the enterprise. However, in addition to this, MPP "Kolosok" produces aromatic water and dry apple pomace.

The enterprise constantly invests significant funds in the modernization of equipment and the introduction of more efficient technologies. Currently, MPP "Kolosok" uses high-tech equipment from leading manufacturers, such as Bucher, B&P Engineering, Wiegant, Flottweg.

Our enterprise currently produces organic clarified apple concentrate. Thanks to temperature treatment, the entire complex of vitamins and minerals contained in fresh fruits is preserved.

The enterprise carries out quality control at all stages of production: from the collection of raw materials, processing, processing and to the shipment of finished products, which is carried out by its own laboratory.

MOL'FAR EKO

LLC

MOL'FAR is a young Ukrainian brand, founded in 2016. Despite the young age, we definitely know what goals we set for ourselves. We are united by dedication to minimalism and reduction of overconsumption for the sake of long-term preservation of the environment.

MOL'FAR organic tea is for modern and energetic people who care about health benefits of the product and appreciate the rich taste of tea.

The main ingredient of our tea is finest rosebay willowherb, which is known for its medicinal properties and is collected in an ecologically clean region of the Ukrainian Carpathians.

LLC

As an experienced exporter of walnut kernels with more than 15 years of experience, we are committed to promote and develop the reputation of Ukraine on the global market as a sustainable walnut producer.

We are skilled in supplying our walnuts to demanding customers from Retail, HoReCa, Food Industries (Bakery, Pastry, Snacks) in the EU.

We provide a full range of logistical and customization services to make our customers feel comfortable.

Slow Walnuts is our new brand aimed to connect responsible consumers with the traditions of Ukrainian walnut gathering.

What makes our walnuts sustainable?

- Not perfect to look at but truly sustainable
- Socially important product for low-income people
- Higher content of healthy unsaturated oils
- Preserving water - only rainwater is used for irrigation
- Total absence of pesticides
- Biodiversity - the opposite of commercial orchard-grown "industrial" production. Slow production with respect to the environment.

PRIMED

LLC

PRIMED LTD was founded in 1995. Our company is one of the largest producers and exporters of frozen berries and walnut kernels in Ukraine. In 2014, the company was certified organic, and in 2017 it was included in the list of the 3 largest companies producing organic products in Ukraine. Our own production facilities are located in the west of Ukraine, which makes it possible to produce only ecologically clean and 100% natural products. All the products are made from carefully selected raw materials, processed and packaged in accordance with international quality standards. One of the factors for company success is long-term and trustworthy relationships with committed business partners. The company pays special attention to improving communication, evaluation of customers' needs and their satisfaction with the highest quality and insists on continuous improvement. With commitment and experience in the industry, our mission is to provide premium healthy foods for our customers worldwide. We look forward to developing strong partnerships with customers who demand quality products.

HERBS

AGROFIT

LLC

Company AGROFIT LLC was founded in 2001.

Initially, the goal of our business was to grow peppermint herb with high technical characteristics. But later we expanded the range of our products and began to grow many other herbs, such as: Melissa, Salvia, Althea, Thyme, Bidens, Plantain, Motherwort, Lofant anise, Yarrow and others. But high requirements for the impeccable quality of cultivated herbs have remained our main and constant priority.

AGROFIT LLC is the largest producer of medicine herbs in Ukraine. Our herbal raw materials are used in the pharmaceutical, food and perfume industries. The leading companies of Ukraine cooperate with us for many years and in almost all cases the AGROFIT LLC acts as the exclusive supplier of herbs.

Over the long history of the company, we have developed our own technologies for cultivation herbs, and the gained experience and the team of professionals working at the company allow us to obtain consistently high results. AGROFIT LLC does not stop there and introduces new equipment into manufacturing process, which allows to improve the process of cultivation and processing of herbal products.

Since 2021, taking into account the global challenges of climate change and caring for the environment, our company has decided to transition to organic farming, and in 2025 we exported the first batches of organic medicinal raw materials to our partners in the EU. We connect our future development to the status of an organic producer, considering that medicinal herbs should be beneficial to human health.

GRANO TRADE

LLC

LLC “Grano Trade” is a modern enterprise specializing in the cultivation and processing of organic products. The company’s main crops are dandelion roots and leaves, which undergo a drying process at its own production facility. The company is located in the Volyn region, near the Polish border, providing convenient logistics for international cooperation.

The enterprise employs 15 highly skilled professionals who ensure a full production cycle — from cultivation to the final product. In addition to dandelion, the company’s drying facility is used to process a variety of berries, such as currants, raspberries, blueberries, chokeberries, and blackberries. The company also offers a wide range of herbs and flowers.

By combining organic production, modern technologies, and a convenient location, LLC “Grano Trade” is a reliable partner in the field of organic agriculture.

LLC

Shans Vik LLC is a Ukrainian certified organic collector and processor of dried berries and herbs since 2018.

The drying facilities are located in Volyn region, in the ecologically clean area in the middle of forests far from big cities, there we have two natural air drying facilities with heat exchangers. All the raw materials are mainly wild collected and come for processing fresh on the day they are collected. The main processing line of herbs and berries is located in Lutsk, where we grind, divide into fractions, pack and inspect before shipping. 90% of our dried berries and herbs are exported to the EU for tea and pharmaceutical industries and comply with the European standards. The company policy is based on the principles of fair trade and long term relations with suppliers and customers.

HONEY

ORGANIC EXPORT

LLC

Organic Export is a leading Ukrainian honey processing plant established in 2013. Over the years, the company has successfully developed and made a significant contribution to the development of the Ukrainian honey industry in accordance with its mission and company goals. By 2023, Organic Export has achieved a market-leading position in retail distribution and sales volume. Market share of own brand portfolio shows double digit growth from year to year at home market; plays a key role in bulk export sales of Ukrainian honey worldwide. New and modern honey processing lines, packaging labeling machines, first in class quality lab equipped by latest instruments and highly motivated team make us the undisputed leaders in the Ukrainian honey market.

The company's main competitive advantages:

100% TRACEABILITY – own field employees supply best raw honey ensuring full traceability “from field to the drum” for each batch.

QUALITY CONTROL – uncompromised quality control at all stages of production at collection, processing and before shipment which is performed by own high-class laboratory.

GENTLE PRODUCTION – new modern production facilities with a unique processing technology that provides the shortest processing time and preserves all the nutritional properties of honey.

UKRAINIAN BEE

LLC

Ukrainian Bee is a modern factory, created thanks to the introduction of the latest technologies and international standards of honey processing quality at all stages of production.

In 2014, when we already had significant experience in beekeeping and honey processing, and the demand for Ukrainian honey on the international markets increased, we created a new company under the UKRAINIAN BEE brand. Our modern, dynamically growing company quickly achieved a key market position in production and export.

The introduction of UKRAINIAN BEE's own products on the European market took place in 2015 and was highly praised by foreign partners. In 2016, UKRAINIAN BEE was fully launched. The sufficient production capacity and modern technological equipment of the company can satisfy the needs of both Ukrainian and foreign consumers for high quality product. Our company guarantees perfect honey thanks to its own test laboratory with the most modern control devices. The company's laboratory is one of the few in Ukraine that was established in compliance with the Ukrainian and European requirements.

The area of our production complex is 6,000 square meters. The company's production capacity is 120 tonnes of honey per day. It is possible to store more than 1,000 tonnes of homogenised products ready for shipment at the same time.

The company exports to the EU, Japan, and Saudi Arabia

ARNIKA ORGANIC (ARNIKA GROUP)

LLC

Arnika Agroindustrial Group is the largest producer and exporter of its own-grown organic commodities in Ukraine. Also, it is the second-largest organic company in Europe. We produce organic corn, soybeans, sunflower (high oleic), millet, lentils, mustard, flax and hemp. In addition, we implement R&D in breeding and ensure our own storing, handling and processing.

Arnika guarantees full transparency and traceability of the production chain as we use 24/7 GPS- monitoring and unmanned technologies during field operations. Besides, we have a powerful logistics department and can deliver our goods by trucks, rail wagons, sea containers and vessels. Therefore, we successfully export to customers from Europe, Asia, the Middle East and North America and are well known internationally.

We do not stand still and move towards the processing of the commodities we grow. We offer our clients high-oleic sunflower oil (crude and refined) as well as sunflower cake.

ENTERPRISE AVIS

LLC

LLC-enterprise "AVIS" was founded in 1991 in Vinnytsia (Ukraine). The picturesque endless fields, pure land and air inspired us to work in agriculture and processing of agricultural products. Company "AVIS" owns two production facilities in Vinnytsia region (Ukraine), which provides a full sunflower seed processing cycle and offers a wide assortment of products at any stage of the production chain – from crude pressed sunflower oil and cake to fully RDBW sunflower oil and lecithin. Sunflower oil is obtained exceptionally by physical pressing; any extraction methods or chemical substances are not used. LLC-enterprise "AVIS" has 30 years experience in the production of sunflower oil and many years of export experience, including export of organic products, to the European Union, the United States (the company is registered by FDA), Canada, the UAE, China, and Asian countries.

KROZ

LLC

KROZ LLC, located in the village of Antypivka at 126 Nezalezhnosti Street, Zolotonosha district, Cherkasy region, Ukraine, was established in 2011. The company is engaged in sunflower and rape processing. It is certified organic since 2020.

Now the company occupies an area of 3.1 hectares and includes an elevator for receiving, drying, cleaning and storing oil crops with a storage capacity of 30,000 tonnes, a processing plant with an annual production capacity of 11,000 tonnes of oil with a storage capacity of 1,000 tonnes of finished oil products and 2,000 tonnes of by-products (cakes).

Our sunflower oil has excellent taste qualities and surpasses other vegetable oils in terms of nutritional value and digestibility. Unrefined sunflower oil is the most beneficial for health because it preserves all natural components, i.e. vitamins A, D, E and other biologically active substances, therefore it is possible and necessary to consume it raw.

The company meets all the requirements of the ISO 9001 standard.

SAUSES & JAMS

LLC

Stodola is a Ukrainian organic farming and processing company with a full production cycle, that was established in the south of Ukraine in 2015. The company farms vegetables and fruits and processes them into such organic food products as pickles, antipasti, sauces, spreads, drinks, and snacks. All the products are produced according to HACCP principles and certified according to the organic standards (EU organic, COR). The company develops its sales in the Ukrainian retail chains and looks for export opportunities by exhibiting at such international fairs as Biofach, Anuga, and Gulfood.

Our motto is 'Towards a good life together!'

HEALTHY TRADITION

LLC

Healatte and Healthy Tradition are brands dedicated to producing wholesome drinks and foods, founded by a visionary woman with a goal to revolutionize the food processing industry. Our approach centers on quality, unprocessed ingredients, forming the foundation of our philosophy.

The core concept behind all our products is to promote digestion through a plant-based approach, eliminating added sugars, gluten, and preservatives. We prioritize the use of organic ingredients, upholding the highest standards of quality and purity. Our innovative plant-based products, introduced to the market, boast an extended shelf life of 12+ months without the need for preservatives, thanks to technology that preserves nutrients.

Maintaining close relationships with organic farmers and international suppliers, we comprehend all quality aspects from field to table. While our product range encompasses a variety of vegan, healthy foods – powder drinks, snacks, bars, dried breakfasts, and gluten-free bakery – not all are on the market right now. The outbreak of war resulted in a production pause for some products. In 2024, our primary focus will be on expanding exports, particularly our Healatte brand of powder drinks.

Healatte, our healing beverages, gained immense popularity during the pandemic, providing solace and immune support during challenging times. We started exporting our products in 2020 and continue to expand into new markets.

We take immense pride in the unique value our products offer to consumers.

Jiva Ltd is a young company established in 2021. This is a project of like-minded people who consolidated their knowledge in commerce, marketing, and production while seeking to create healthy food.

The company aims to be an innovator on the Ukrainian market and create organic products in those product categories where they do not exist.

The first products were organic snacks – roasted sunflower seeds. The consumers can now eat their favourite seeds without any chemical residues.

We do not plan to stop here and are working on development of new products in other categories.

LLC

The family company “OGO” specializes in the production of exclusively natural healthy treats and food products. Our mission is to make the usefulness accessible.

The recipe for making healthy delicacies from apple puree and berries has been passed down in our family from generation to generation. The main feature of this recipe was the low temperature cooking, which allowed to preserve the original taste and all the natural useful qualities of the ingredients.

Our production facilities are situated in the ecologically clean region of the Ukrainian Carpathians, in Ivano-Frankivsk city. For the production of our Carpathian fruit snacks we use fruits and berries which are growing and picked right here.

NATURE GREEN UKRAINE

LLC

Nature Green Ukraine LLC was established in 2018. Our facility is located at the foot of the Carpathian Mountains in the west of Ukraine, on the border with Slovakia and Hungary. The company produces cultivated fresh organic shiitake mushrooms of top quality. We strive to satisfy our customers by reaching high standards of professionalism and reliability. At Nature Green we make our own first-class organic substrate to produce high-quality organic mushrooms. Using a bulk sterilization system allows us to produce wood substrate in a very energy efficient and hygienic way while being conscious of our environmental footprint.

The company's biggest importer is located in Hungary with end customers in Germany, Belgium, and the Netherlands. Environmentally friendly, exotic mushrooms straight from the eco-farm!

**CATALOGUE OF UKRAINIAN
ORGANIC EXPORTERS**

PARTNERS

SWISS-UKRAINIAN PROGRAM “HIGHER VALUE ADDED TRADE FROM THE ORGANIC AND DAIRY SECTOR IN UKRAINE”

Short name	Quality FOOD Trade Program (QFTP)
Development partner	Swiss State Secretariat for Economic Affairs (SECO)
Executing agency	Research Institute of Organic Agriculture (FiBL, Switzerland) in partnership with SAFOSO AG (Switzerland)
Beneficiaries	Ministry of Agrarian Policy and Food of Ukraine, State Service of Ukraine on Food Safety and Consumer Protection
Recipients	Ministry of Agrarian Policy and Food of Ukraine, State Service of Ukraine on Food Safety and Consumer Protection, State Institution “Entrepreneurship and Export Promotion Office”
Target groups	Private SMEs (producers, processors), NGOs and service providers in organic and dairy sectors, as well as relevant governmental institutions
Implementation period	01.07.2023 – 30.06.2026

The overall goal is to promote sustainable trade and create more and better jobs by strengthening the business competitiveness and capacities of SMEs in the organic and dairy sectors by pursuing two outcomes:

► Outcome 1: Regulatory framework is improved and aligned with EU regulation and the business environment is enhanced

Activities related to Outcome 1 will contribute to capacity development at the government level, in particular through support on implementation and alignment of regulatory framework with the EU legislation in the organic and dairy sectors (Output 1.1). At the institutional and sectoral levels, the focus will be on strengthening the capacities and networks of public institutions and private value chain actors for effective enforcement and compliance with the legislation (Output 1.2).

► Outcome 2: Trade capacity is increased in the domestic and export markets with higher value-added products in the organic and dairy sectors

Activities related to Outcome 2 will increase SMEs’ trade capacities in the domestic and export markets (Output 2.1) driven by systemic capacity development involving both public and private service providers and networks to promote the application of good practices, value addition and trade development (Output 2.2).

ORGANIC INITIATIVE

PUBLIC ASSOCIATION

ORGANIC INITIATIVE

ABOUT THE ORGANIC INITIATIVE:

The Organic Initiative is a platform of key Ukrainian organic stakeholders, established in April 2020, which aims to contribute to organic sector development in Ukraine and promote organic trade on the domestic and international markets. The Organic Initiative unites different private organic stakeholders which, through cooperation, expand their opportunities, establish a long-term cooperation, and contribute to integration in the organic sector and development of the Ukrainian organic market.

ABOUT THE ORGANIC INITIATIVE GRANT PROGRAM:

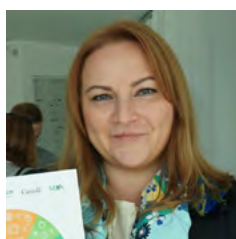

The Organic Initiative considers it necessary to continue supporting the organic sector, which, being a part of the agri-food sector of Ukraine, affects food security as well as environment and biodiversity suffering from hostilities. Once a dynamic and profitable organic sector of Ukraine could have stopped operating since Russia invaded Ukraine on 24 February 2022, that's why Organic Initiative has started the Grant Program "Support of the Organic Sector in Ukraine" in May 2022. The main goal of this Grant Program is to support micro-, small and medium enterprises and small-scale farmers.

Learn more about the Grant Program initiated by the Organic Initiative Public Association in Ukraine.

ORGANICINFO.UA

OrganicInfo.ua is a specialized information portal that aims to promote organic production, organic food and sustainability.

OrganicInfo – is a project of the Information center “Green dossier”, an international environmental charitable organization established in 1994. “Green dossier” aims to integrate principles of sustainable development in to society, country policies and governmental programmes by providing objective environmental and social information through mass-media, local communities, authorities, businesses, – involving all of them into practical actions. Organic agriculture – is one of the most promising activities promoting transformation to sustainable development and green economy.

And it's very important for humanity because the agro-industrial sector provides with workplaces almost one-fifth of the world population. But at the same time, it's one of the biggest polluters of the environment and consumers of drinking water. Organic agriculture helps to restore soil fertility, save biodiversity, reduces a negative impact on water resources.

WE PROVIDE:

clear, professional and relevant information about organic market in Ukraine and worldwide:

- **news and events**
 - **organic legislation**
 - **practical information for organic operators**
 - **useful information about organic for consumers**
- on regular bases.**
